INTRODUCTION

This APS Pre Revision Question Bank contains some examples testing the new overseas rules and 3 exam standard case study questions all with answers updated to Finance Act 2025.

As you answer the questions you may refer to either a hard copy or on-screen version of the **CTA Tax Tables 2026** and your own personalised version of the approved online legislation.

Using this question bank

You should now use this question bank to practise your technique and timing. Practice is the key to passing the APS paper – if you do not approach these practice case studies in the same way as you will the ‘real thing’ you will be reducing your chances of obtaining a pass.

Remember that you can read the pre-seen information in advance of attempting each question - it is always the final Exhibit.

Make sure you have 3.5 hours of uninterrupted time – stopping and starting means you may well take more than the allotted time and will give you a false impression of what can be achieved. 3.5 hours may seem a long time to allocate to practise a case study – but remember developing your exam technique for this paper is just as important as learning the technical detail required.

Do not attempt these case studies by just planning your answer and then reading the suggested answers. It is vital to practice typing up a full answer.

We recommend you complete a “Reflection” sheet each time you have finished a case study as part of the self-review process where you compare your typed up answer to the suggested answer provided and so we have included a copy of this sheet at the end of each answer in this question bank.

Guidance on Approach to APS questions

Over the next few pages there is some general information on how to approach the APS paper in order to be successful in this part of your CTA examination.

There is also some information about the way this case study paper will be marked.

Revision Question Banks

A separate further Revision Question Bank containing six further case studies will be available nearer to the date of your real exam.

REVISION GUIDANCE

PURPOSE OF THE APS PAPER

The purpose of the Application and Professional Skills paper (APS) is to test your ability **to produce a report or letter which a client would value**.

It does this by focussing on **three skills** – Structure, Identification and Application (I&A) and Relevant Advice and Substantiated Recommendations (RA&SR).

In order to secure a pass, you are required to demonstrate **competence in all three** skills. We shall look at the way these competencies will be assessed in more detail later in this guidance.

The Case Study Question

The question will be drafted in such a way that:

- You need to **apply** your technical knowledge rather than simply regurgitate it
- You need to **weigh up options** and **reach a conclusion** as to which is the best option
- Detailed computations will not need to be prepared in order to answer the question
- Detailed technical analysis of obscure points will not be required
- You need to **communicate** information which may be complex in a clear manner and so the requirement will **always be for a report or letter to a client**
- It tests a **range of material** including topics from the matching Advanced Technical (AT) paper(s) as well as the specified awareness level topics (per the syllabus grids)

The CIOT anticipate that a full answer would be between 3,000 to 3,500 words (3,500 is an absolute limit given to the examiners when they draft their model answers) but there is no need for you to focus on word count in your answer script, this info is just given for guidance.

It is likely that questions will require **planning for a future action** rather than simply commenting on historic events.

It is also likely that consideration will be required of **interaction** between **taxes**. **Aspects of the law, ethics and accounting** CBE syllabuses may also need to be considered where relevant and appropriate.

The first part of the question will always be the introduction. This will cover key introductory matters but will not contain detailed material. It will be around half a side long, giving an **outline of the scenario** and will provide you with a good idea as to the likely requirements.

The introduction will cover:

- Who you are – eg stating “You are a Tax Manager in a firm of Chartered Tax Advisers.”
- Who the client is
- Outline of the scenario
- Reference to exhibits, for example – “you have recently received a letter (**EXHIBIT A**) from Mr Jones regarding his future plans.”

Exhibits

Exhibits will be as similar as possible to **real documents** that may be presented to an adviser in practice.

Types of exhibits may include:

- Letters from clients and other advisers
- Emails from clients, colleagues and other advisers
- Accounts or extracts from accounts
- Extracts from reports from other advisers, eg solicitors, surveyors
- Extracts from legal documents (such as share option agreements or Wills)

The final exhibit will always be the pre-seen information.

Pre-seen Information

The pre-seen information will give **background details** relevant to the client in the question, but it will not guide you as to the actual examination question requirements. The intention behind the material is to **allow you to become familiar with the background of the client** to avoid confusion on the day.

It is intended that the pre-seen information will better equip you to deal with the case study in the examination environment and make the question more aligned to a client situation in which you may be involved.

The pre-seen information will not include information on the anticipated transaction or event that is the subject of the question. As is the case in practice, the pre-seen information may include material which is not required to answer the question.

It will be provided **two weeks in advance** of the examination. You will only receive the pre-seen information for the question you registered for when you sent in your exam entry.

You **may discuss** the pre-seen information with whoever you choose.

The pre-seen information will be provided again with the question, as the final exhibit.

The pre-seen information will comprise information which would typically be found in a client **permanent file**, such as:

- Name, date & place of birth.
- Name, date & place of birth of spouse (or statement that not married) plus date of marriage.
- Confirmation of residence and domicile status (unless to be determined by the question).
- Names & dates of birth of children.
- Will or statement that there is no Will.
- Details of income (eg, employment income, investment income).
- Details of assets (including costs and current values).
- Other financial information (eg, property business accounts).

APPROACHING THE APS PAPER

The Application and Professional Skills (APS) paper will test your ability to **apply** your tax knowledge to a practical case study.

In order to be successful in this paper you will need to have the ability to:

- Sift through information, distinguishing between the key elements and those which are less important;
- Communicate clearly in a manner appropriate to your client giving clear recommendations and coming to a conclusion;
- Apply knowledge to a problem which will involve an understanding of the interaction of several taxes and which may not have a single correct answer.

Whilst the case study may well require you to carry out computations, this will only be in the context of providing results for you to comment on in depth in the written part of your answer.

The case study will require you to prepare a **detailed report or letter for your client** and you should incorporate an **Executive Summary** in your answer.

As this paper is intended to be a practical case study, whilst there will be a clear requirement, the specific content required will not be set out in detail.

In particular, you will be expected to **identify and comment on relevant ethical, professional, legal, accounting, regulatory and commercial issues** although the question requirement may not explicitly mention these.

Similarly, you should **consider the possible application of other taxes** to the scenario, beyond the primary tax being examined. It is important to be able to differentiate between various taxes, whilst considering the impact of one on the other.

The case studies are **not intended to be time pressured**. The aim is to allow you to have time to submit a complete answer, thus demonstrating your ability to deal with practical situations.

Successful candidates should be able to demonstrate a good technical knowledge of the tax topics examined in the **related Advanced Technical syllabus** paper(s) and the **Awareness topics identified as within the syllabus for their chosen APS case study**.

Such students should also have an understanding of aspects of ethics, law and accountancy relevant to a tax practitioner from the CBE text books.

The examiner will be looking for:

- sufficient breadth of knowledge to appreciate all the tax implications of a particular problem
- Identification of the key issues
- Application of knowledge to arrive at sensible recommendations and coming to a conclusion
- Communication skills, using a well-structured pattern
 - use of headings
 - use of good English
 - use of summaries

Good examination technique is essential. It is the **quality** of the work produced that is important – **not** the **quantity**.

Due to the nature of the paper, there is unlikely to be a single correct answer. Credit will therefore be given for conclusions and recommendations which are different to the examiner's model answer but which are reasonable based on the information provided.

As you read the following notes which have been produced to help you deal effectively with the case studies, it is important to remember to **focus on demonstrating your professional skills** as well as application of your tax knowledge.

You need to take into account the **format** of the response, whether the style and tone is suitable for the client and whether the response is structured effectively.

Therefore, whilst it may be natural that your initial focus is likely to be on the technical detail required, it is just as important to plan how and to what extent that detail needs to be included in your answer.

This is not just a technical paper. It is a **test of your professional skills** as a tax adviser.

Approach to the Case Studies

You should aim to adopt the following approach when attempting a case study:

1. READ
2. ANALYSE
3. PLAN
4. WRITE
5. REVIEW

1. READ

The CTA APS exam is 3.5 hours.

Start by identifying the issues carefully. This is important to establish some key things:

- Who you are
- What you are required to do
- Who you are writing the report to

These are important facts you must register before you move on to the next stage.

In the real examination you will have already had the pre-seen information but remember this will be provided to you again as the final exhibit.

The starting point is to **read the requirement**, which is in bold text usually on the first page of the case study. However, the requirement may be general in nature, for example 'Prepare a report addressing Jane's queries', so a review of all the information provided is necessary at this stage.

Now read the information contained in the body of the question and the exhibits, **highlighting key information** and jotting down notes on a piece of paper. Most of the detail will be in the exhibits so make sure you are comfortable with what is there.

In particular you should consider carefully the issues highlighted in the question and the information that is likely to be important, for example:

- Family relationships, ages etc (you may already be familiar with this from the pre-seen info).
- Business structures (possibly already known from the pre-seen information).
- Needs of client and any preferences expressed/courses of action ruled out.
- Actions already undertaken.
- Reliefs available.
- Timing issues.

Now **re-read the requirement**. It is very easy at this stage to formulate an answer to what you would LIKE the question to ask, rather than what it ACTUALLY asks. Make sure you do not fall into the trap of typing up an answer that is not relevant to the question asked.

During this initial reading time you should have time to look up things in the legislation that will help you answer certain parts of the case study. Leave the legislation open at the relevant pages.

2. ANALYSE

Once you are satisfied you understand the requirement, you can move on to the next stage. Do not rush this part, as it is crucial to the whole process.

In the light of the requirement, re-read the question, decide which facts are important/relevant/not relevant. **Determine the areas to be addressed** in the answer.

Remember that each sentence and exhibit is there for a reason – there should not be much irrelevant information. Information may be included to highlight an issue, to identify a key point or to eliminate a course of action the examiner does not want covered.

There will be certain pieces of information that you either do not understand or cannot see the relevance of. It is possible for example that you will not use all the information provided in the pre-seen information. You need to concentrate on what you know and what you can do. Think positively and do not dwell on the areas you cannot get credit for.

For each issue you have highlighted – unless stated otherwise – you should **consider the implications for all relevant taxes**.

Look up in the legislation any areas of uncertainty, conditions etc.

3. PLAN

Now is the time to **produce a plan of the answer you intend to produce**.

You can either **handwrite or type** your plan but note that it will not be marked by the CIOT so it does not need to be included as part of your answer – the marker will only assess the actual report/letter you are asked to produce. You may decide that you prefer to handwrite your plan for ease of reference. You may decide you prefer to type it so that you can expand it. You need to practice these different approaches to work out whether handwriting or typing your plan works best for you.

For each issue you have highlighted, you should note down the areas which need to be discussed, taking into account the order of importance and considering all the implications. The plan can be in bullet point format but should contain sufficient detail to act as a checklist for when you start writing the actual answer. By producing a useful plan, you should be able to ensure that all points are covered in your final answer in a logical order.

You may have to **perform calculations as part of the plan** so that you can then analyse/comment on the results. These calculations should be typed up straight away as part of your answer – not handwritten. You should include them as an Appendix to the report/letter you will go on to write.

By the time you have finished the plan the hard work is really over – not only do you know what the case study wants you to consider, but you have now also considered all aspects, decided what needs to be included in your answer and know what **recommendations** you will give your client in the report/letter and the conclusion you have come to with regard to any options discussed.

Remember to determine the format of your answer – this is usually specified in the requirement.

You should also consider how you are going to allocate your remaining time to writing your answer to each element of the case study.

Never overrun on time allocation, as this will have a detrimental effect on your overall answer. Come back to an incomplete section at the end of the exam if you have time.

These first three areas of the approach will take approximately 30 minutes to one hour leaving you between 2 and 2.5 hours of further exam time. The more calculations you have to do the more time you will need to allocate to your plan.

4. WRITE

Only start typing up the formal answer once the analysing and planning stages have been completed.

The format of the answer is very important. If the correct format is not used, there is significant risk that you will not be awarded a pass for the “Structure” competency. You will then fail the paper.

The following formats are recommended:

REPORT

TO:
FROM:
DATE:
SUBJECT:

The report should start with an “Introductory section” (normally no more than half a page) which should say:

- Who the report is intended for.
- What the report is based on (for example, “this report is based on your meeting with Amy Lim on 23 April 2026 and your subsequent letter to Amy dated 24 April”).
- Who can rely on the report. We suggest you simply remember the following standard wording: “This report is intended solely for use by you. Chartered Tax Advisers LLP accepts no responsibility for any reliance placed on this report by other parties”.
- The purpose of the report (summarised briefly).

A contents page is not required.

You can assume that the scope of the report is covered by the engagement letter. Unless it is specifically suggested otherwise in the question, there is no need to refer to the engagement letter in your answer.

If there are any limitations to our advice, these should be stated. Remember we are tax advisers, not lawyers or investment advisers. So any legal or investment advice should be referred to the client’s solicitor or IFA.

The Introductory section should be followed by an Executive Summary.

Normal practice is to type this up last (but make sure it is inserted after the Introductory section).

The Executive Summary summarises the main advice and recommendations. There should be sufficient information in the Executive Summary that the reader can understand the recommendations without reading the detailed analysis. In effect, the Executive Summary is a snapshot of the key recommendations which can be read as a stand-alone document.

You should not introduce anything new in the Executive Summary. Everything in the Executive Summary should be available in the body of the report.

There is no need for a separate 'Conclusions' section at the end of the report as this is likely to be a repetition of the Executive Summary. [You will not lose marks for this, but you will have wasted time.]

Even though the client will have contacted your Tax Manager / Tax Partner for advice, the report is from your firm to the client. **The report should therefore use "We" throughout.** Alternatively, **you may prefer to use the third person**, eg. "[client name]" instead of "you" and "It is recommended that" instead of "we recommend". Whichever you choose, **you must be consistent** and not jump between the two. The use of "I" is not appropriate in a report.

The body of the report should be divided into sections (each dealing with a separate issue). A numbering system should be established. Keep this simple. Following the layout of the answers in this question bank is recommended.

The report should include appropriate advice, recommendations and conclusions. These are the key points which should be extracted for the Executive Summary.

Where advice is supported by computations, these should generally be in Appendices at the end of the report. Short "one or two line" calculations can be shown in the body of the report as you go along if you think that is beneficial to the reader.

It is important to **include and explain your workings**. This ensures that even where an error is made early on, credit can be given for the method applied to the later parts.

LETTER

Letters should be correctly addressed using the address information in the question. Letters should be headed, finished and signed off (do not use your own name – "Tax Adviser" will do).

[Client Name & Address per Q] [Firm's Name & Address per Q]

Date

Dear [Client Name per Q] – eg, Dear Alex / Dear Mr Brown

SUBJECT OF LETTER

Introduction

Summary of Key Points (Executive Summary)

Body of letter (divided into sections)

Yours sincerely
Tax Adviser

If the client is referred to by their title throughout the question (for example, Mr Brown) or if the title is used in correspondence between adviser and the client (in the Exhibits), the title should be used in the salutation (for example Dear Mr Brown).

Normally however, the question will use forenames throughout and the salutation should therefore replicate this (for example, Dear Alex).

The first paragraph should briefly set out the background to the letter and the information on which it is based (for example a letter from the client). It should say who can rely on the letter.

Any limitations of advice should be stated here.

At APS IND, it is very likely that a letter question will require a letter from one individual to another (or to a joint client such as a couple), so **use of first person is acceptable**. For example, “I recommend”, “I advise” etc is normally appropriate. You would then sign off as “Tax Adviser”.

Instead, you might choose to write to the client in your position as a representative of your firm. In that case “we” is accepted. You would then sign off as “Chartered Tax Advisers LLP”.

It is important that the use of “I” or “we” is consistent. Never jump between the two.

After the Introduction, there should be an ‘Summary of key points’ to set out the key findings/conclusions of the letter. This serves the same purpose as an Executive Summary in a report and could also be called that.

The letter should be divided into sections. A numbering system for those sections is normally helpful.

Supporting computations should generally be in an Appendix.

The letter should include advice, recommendations and conclusions.

The letter should be signed off with “Yours sincerely”.

Advice common to both reports and letters

Always keep in mind that **you are asking a client to pay for the document you are producing!** The examiners are themselves tax advisers and will always have that in mind. Therefore put yourself in your client’s shoes and ask yourself whether you would pay money for the advice you are receiving.

First and foremost, your answer **must be written in a way the client can understand**. Clients do not want a series of options – they want **recommendations** as to which of the options should be adopted or discarded.

Above all else, clients want to know:

- 1) WHAT they should do; and
- 2) WHEN they should do it.

It is vital that you **come to a conclusion**. Don’t sit on the fence. You are unlikely to pass this paper unless you make sensible and positive recommendations which your client can understand.

Do not be afraid to state the obvious (credit is often allocated for this) but keep answers short and to the point. Remember “quantity” is not important. The examiner does not want to spend his time reading irrelevant and unnecessary paragraphs.

Try not to put more than one important point in each paragraph. Otherwise your points may get lost and you will not receive credit for them.

Leave a line between each paragraph. “White space” is important and helps the marker. It also helps the product look more professional.

Paragraphs should ideally **not run to more than three or four- lines**. Using short “snappy” paragraphs makes answers easier on the eye, and therefore more likely to attract credit.

A handy tip is to **say the sentence to yourself in your head before you type it**. If it doesn't make sense, don't type it!

Always use good grammar and spell words correctly. Do not use slang.

Try not to baffle the reader with technical jargon. Your client is not a tax expert. If they were, they wouldn't need you. So **keep your language clear and simple**.

Use full sentences, even when any lists or bullet points are being used.

Abbreviations are acceptable as long as they have been previously defined. For example, "The gain on the disposal of your shares will be eligible for Business Asset Disposal Relief (BADR). The effect of BADR is to reduce the rate of tax on the capital gain to X%..."

The APS paper is testing your professional skills - you need to show the marker that you deserve to be awarded the CTA qualification because you can provide **clear, relevant and reasoned tax advice** to your client.

Whilst in theory it would be possible to score well on professional skills even though the technical standard of your answer was poor, this is a fairly unlikely scenario. To be assessed as competent with regard to your professional skills, it will almost certainly be necessary for you to have demonstrated reasonable technical skills.

Nevertheless, where a technical inaccuracy flows through the remainder of the answer with consequent differences in the conclusions drawn and advice offered, you could still be assessed as a competent with regard to your professional skills.

The CIOT guidance on letters and reports is included in Appendix B later in this section.

5. REVIEW

About 10 minutes before the end of the examination you should sit back and review your answer and fine tune it as needed.

Make sure you have produced an **Executive Summary / Summary of Key Points** and that you have included this at the **start** of the report/letter (just after the Introduction), even if you created it last.

HOW THE APS PAPER IS MARKED

The following information is a copy of the document available on the CIOT website.

Introduction

In order to secure a pass in this paper, candidates are required to demonstrate competence in each of three skills:

- Structure
- Identification and Application
- Relevant Advice and Substantiated Recommendations

Structure

Structure is assessed across the answer as a whole and a pass or fail grade will be awarded. As noted above, a fail in this skill (or in either of the other two skills) will result in an overall fail. In arriving at the result for this skill, each of the following factors will be graded as either No Fault, MINOR Fault or MAJOR Fault (with a single grade for each – i.e. a candidate cannot get multiple MINOR faults on grammar and spellings for example):

- Overall format
- Introduction and conclusion
- Clear layout with headings
- Flow of answer
- Appropriate style
- Grammar and spellings
- Appropriate calculations
- Lack of irrelevant material

A candidate will pass Structure if they have either:

- 1) No MAJOR faults; or
- 2) One MAJOR fault and no more than 3 MINOR faults.

A candidate will fail Structure if they have either:

- 1) Two or more MAJOR faults; or
- 2) One MAJOR fault and four or more MINOR faults

Further narrative on what is expected for each factor is set out in Appendix A. Note that a different, but appropriate style to that adopted by the examiner will not be a fault.

Identification and Application

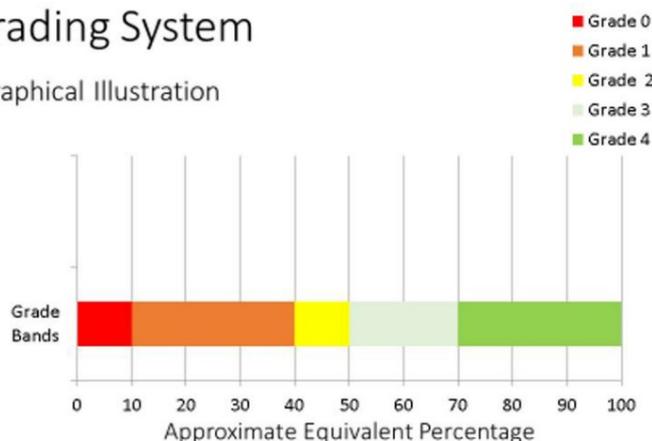

Identification and Application is assessed for competence across a number of broad topics within the answer. There will typically be four to six topics and a grade will be awarded for performance in that topic of 0, 1, 2, 3 or 4 as follows:

<i>Grade</i>	<i>Description</i>
0	Not attempted
1	Competence insufficiently demonstrated
2	Limited competence demonstrated
3	Competent
4	Highly competent

If a perfect answer represents 100%, the above grades may be considered as roughly equal to the following percentages of a perfect answer.

Grading System

Graphical Illustration

The grades awarded for each topic will be weighted and averaged to produce a weighted average grade for the skill across the whole answer. The weighting will reflect the importance and anticipated time required for each assessment area. The weighted average grade will be converted to a final grade of 0,1,2,3 or 4 as follows:

Weighted Average Grade	Final Grade
0.00 – 0.49	0
0.50 – 1.49	1
1.50 – 2.49	2
2.50 – 3.49	3
3.50 – 4.00	4

As noted above, a final grade of 3 is required to secure a pass, which means that candidates must achieve a weighted average grade of at least 2.5 across their answer.

For each topic the following factors will be considered:

- 1) Identification of issues (20% to 40%)
- 2) Application of technical knowledge (50% to 70%)
- 3) Use of information - Reference to material in question and Use of information (10% to 20%).

The relative weighting of these factors will vary from topic to topic, but typically will be in the ranges set out above.

Further narrative on what is expected for each factor is set out in Appendix A.

Relevant Advice and Substantiated Recommendations

The method of assessment of this skill is the same as for Identification and Application except that there will normally be fewer topics: typically between three and four topics.

For each topic the following factors will be considered:

- Questions posed by client answered AND Client advised what to do (20%-30%)
- Options weighed up AND Recommendations and conclusions supported AND Recommendations & conclusions weighted appropriately (30%-50%)
- Technically correct advice (10%)
- Commercial advice (20%-30%)
- Ethics and law (0%-10%)

Further narrative on what is expected for each factor is set out in Appendix A.

APPENDIX A - NARRATIVE ON ASSESSMENT FACTORS

Structure

Factor	Detail	MAJOR and MINOR faults
Overall format	The answer is set out in the format demanded. Thus, if it is a letter, it will be properly set out as a letter with addresses, date, "Dear X" and conclude "Yours sincerely" etc. If it is a report, it will give some indication as to what it is about and who it is for.	<p>Failure to produce an answer in the required format (for example, producing a letter when a report is required, or vice versa, or producing what is essentially a memo rather than a report) will be a MAJOR fault.</p> <p>Having adopted the correct format, errors in the format (for example, using "Yours faithfully" when the letter starts "Dear Rashid") will be a MINOR fault.</p> <p>Differences of style are not a fault.</p>
Introduction and Conclusion/Executive Summary	<p>The report or letter should contain an introduction setting out the terms of reference, information being relied on etc.</p> <p>It should also contain a summary of the key findings and recommendations in a Conclusion/ Executive Summary. (the actual content of the Conclusion/Executive Summary is marked under Relevant Advice and Substantiated Recommendations).</p>	<p>Omission of either the introduction or the Conclusion/Executive Summary will be a MAJOR fault.</p> <p>Omission of elements of the introduction will be a MINOR fault.</p>
Clear layout with headings	The body of the letter or report should be laid out in a clear way with appropriate headings so that the reader can navigate around it easily and spot the key areas without reading the entire document to try to find a discussion of, for example, income tax on some employment related shares.	<p>A failure to use appropriate headings will usually be a MINOR fault.</p> <p>If the layout is extremely poor with no headings this will be a MAJOR fault.</p>
Flow of answer	The answer "flows" so that a logical chain of thought is presented to the reader rather than a series of random comments (which may nevertheless be technically correct).	<p>Occasional elements of the answer not in a logical order will be a MINOR fault.</p> <p>An answer which is significantly jumbled will be a MAJOR fault.</p>

<p>Flow of answer (continued)</p>	<p>For example, this means that:</p> <ol style="list-style-type: none"> 1) A tax rule should be explained first and then applied. 2) It may be ordered so that: all taxes on a particular topic are considered together; all topics for a tax are considered together; or perhaps all topics for a relief are considered together. What is appropriate may depend on the question. It may also be the case that different approaches to the same question could be taken. 	
<p>Appropriate Style</p>	<p>The style of writing should be appropriate to what is being produced. For example, a report to a client or lay person should not contain lots of legislative references. The letter/report should not be written in the form of notes.</p>	<p>Extensive use of brief bullet points will be a MAJOR fault. The appropriate use of lists and appropriately numbered and explained points in full sentences will not be a fault.</p> <p>Inclusion of some references will not always be a fault, particularly if there is a discussion (for example) about the application of a key case to the client's situation.</p> <p>Significant numbers of inappropriate references will be a MINOR fault.</p>
<p>Grammar & spellings</p>	<p>The letter or report should be grammatically correct and free of spelling mistakes.</p>	<p>In practice, an adviser is likely to use a spelling and grammar checker and accordingly occasional spelling and grammatical errors will not be a fault.</p> <p>A number of errors such that a client would clearly notice them will be a MINOR fault.</p> <p>Large numbers of errors throughout the answer such that it becomes a significant distraction for the client will be a MAJOR fault.</p>
<p>Appropriate calculations</p>	<p>The answer should contain an appropriate level of calculations. This may mean no calculations, illustrative calculations or specific calculations. Any calculations should be linked to the narrative.</p>	<p>Only the appropriateness of calculations is considered here. The accuracy of calculations is assessed as part of Application of Technical Knowledge</p> <p>Excessive calculations will be a MINOR fault.</p>

<p>Appropriate calculations (continued)</p>		<p>A failure to adequately link the odd calculation to the answer will be a MINOR fault.</p> <p>A failure to provide a minor calculation which might be expected but has not specifically been requested in the question will be a MINOR fault.</p> <p>An absence of calculations or illustrative calculations where required or a failure to link most calculations to the answer will be a MAJOR fault.</p>
<p>Irrelevant material</p>	<p>The answer should not contain large amounts of irrelevant or duplicated material.</p>	<p>Isolated and brief irrelevant material will not be a fault.</p> <p>An element of duplication is expected in that the Executive Summary (or equivalent) will summarise and refer to material elsewhere in the answer.</p> <p>Occasional irrelevant or duplicated material will be a MINOR fault</p> <p>Large quantities of irrelevant or duplicated material will be a MAJOR fault.</p>

Identification and Application

Factor	Detail	Weighting of Factor for each Topic	Grading Guidance
<p>Identification of issues</p>	<p>The issues which are specific to the client and the requirement of the question should be identified. This covers not only the requirements identified by the client but also issues which the candidate should identify from the information as important to the client.</p>	<p>20%-30%</p>	<p>1 = The issues specific to the client and the requirements of the question have not been identified or have only been identified to a very limited extent.</p> <p>2 = The requirements of the question have been identified and some issues specific to the client have been identified to a very limited extent.</p> <p>3 = The requirements of the question have been identified and most issues specific or important to the client have been identified including some of those which may not be spelt out in the question or referred to by the client. Explanations are of a satisfactory standard.</p> <p>4 = All requirements of the question have been identified and all or virtually all issues specific or important to the client have been identified and clearly explained.</p>

<p>Application of technical knowledge</p>	<p>Technical information provided is correct and has been applied correctly to the specific circumstances of the question.</p> <p>As part of this, the accuracy of calculations will also be considered. However the focus is primarily on the method rather than the arithmetical accuracy.</p> <p>The application of knowledge includes its indirect application to other taxes which may be relevant to the scenario</p>	<p>50%-70%</p>	<p>1 = The technical information provided is largely incorrect and it has not been applied to the specific circumstances of the question</p> <p>2 = The technical information is broadly correct, but it has not been provided for all issues identified or it hasn't been applied to the specific circumstances of the question.</p> <p>3 = The technical information is correct except for minor points and has been provided for all issues identified and to the circumstances of the question. There may be some minor lack of clarity in explanations or in the quality of explanations.</p> <p>4 = Technical information is correct except for very minor points, is applied appropriately and is clearly explained. Calculations are largely arithmetically correct as well as correct in their method.</p>
<p>Use of information</p> <p>Reference to question</p>	<p>Information provided to the candidate in the question has been used appropriately.</p> <p>Candidate has referred back to question where appropriate.</p>	<p>10%-20%</p>	<p>1 = Little reference back to material in question nor has information in the question been used appropriately.</p> <p>2 = Some attempt to refer to information provided or use information appropriately.</p> <p>3 = A reasonable attempt has been made to use information provided in an appropriate way.</p> <p>4 = Very good attempt to use information provided in an appropriate way.</p>

Relevant Advice and Substantiated Recommendations

Factor	Detail	Weighting of Factor for each Topic	Grading Guidance
<p>Questions posed by client answered</p> <p>Client advised what to do</p>	<p>Any questions posed by the client must be answered and advice provided.</p> <p>A client comes to a Chartered Tax Adviser to be advised as to what to do. This means that they should not simply be presented with a series of factually correct observations and then left to interpret what they should do, but instead should receive considered and appropriate advice recommending what they should do.</p>	<p>20%-30%</p>	<p>Key Question - “What should I do?”</p> <p>The key element of this factor is that the client is advised what to do. Merely answering specific factual questions posed by the client (for example, “Is transaction X taxable?” carries little weight in the assessment as this should be a given in any answer.</p> <p>Open questions like “should I do x or y?” require the client to be told what to do.</p> <p>Questions may also be implied rather than explicitly set out in the question.</p> <p>1 = Some attempt has been made to answer any specific factual questions posed by the client but no attempt has been made to tell the client what they should do. Implied questions are not answered.</p> <p>2 = All Specific factual questions posed by the client have been answered and a limited attempt has been made to tell the client what they should do. Some implied questions may have been identified.</p> <p>3 = All specific factual questions posed by the client have been answered. A reasonable attempt has been made to advise the client what to do. Implied questions have been identified but the advice may not be fully developed.</p> <p>4 = All questions have been answered and good advice has been provided to the client on what to do.</p>

<p>Technically correct advice and recommendations (continued)</p>	<p>example to discuss either something which is purely factual or as analysis before advice is covered in Identification and Application. The score will therefore mainly (but not exclusively) relate to the Executive Summary (or equivalent).</p>		<p>contradiction where the candidate seems unclear on the correct position. Alternatively, there may be incorrect technical advice on relatively minor areas which would fundamentally change the recommendations.</p> <p>3 = In relation to all key areas, the advice provided is technically correct. In some minor and unimportant areas which would not affect the overall recommendations, the advice may not be complete or technically correct. There are no significant contradictions in technical advice.</p> <p>4 = The advice provided is technically correct.</p>
<p>Commercial and wider advice</p>	<p>Advice provided should not simply provide an answer which produces the best tax outcome, but should also consider the wider position to ensure that the advice is appropriate.</p> <p>It <u>may</u> include a consideration of:</p> <ul style="list-style-type: none"> i. Commercial/financial outcomes ii. How HMRC may view the advice/transactions. iii. Practical/operational factors iv. Social/environmental/technical /funding issues <p>The above list is not exhaustive as the issues identified should be appropriate to the scenario. Candidates are not expected to go into depth on the above areas but should be evidencing an appreciation that their advice should not be seen in isolation. It is important to recognise that better answers will add value to the client.</p>	<p>20% - 30%</p>	<p>Key Question – “Has the candidate demonstrated a wider thought process?”</p> <p>1 = The advice provided is in isolation and there has been no significant attempt to consider the wider implications.</p> <p>2 = There has been a limited attempt to consider the wider implications of the advice but this is incomplete or impractical.</p> <p>3 = There has been a reasonable attempt to consider wider implications, including for example how HMRC may consider the transaction or what further advice from other professionals may be required. There may be minor elements of the advice that are not entirely commercial, or practical</p> <p>4 = There has been a good attempt to consider the commercial implications of the advice including wider issues. Advice given is commercial. The client is likely to feel that the answer has added value.</p>

<p>Ethics and law</p>	<p>Where the topic contains matters on which candidates are expected to comment on legal or ethical matters, credit will be available. On some topics there may be no expectation of comment and hence no credit available</p>	<p>0%-10%</p>	<p>1 = Some ethical and legal issues identified but with little explanation of the implications nor recommendations.</p> <p>2 = Ethical and legal issues identified with explanation of implications but little in the way of recommendations.</p> <p>3 = Ethical and legal issues identified and implications explained with recommendations made. The weighting within the answer may not be appropriate.</p> <p>4 = All elements covered appropriately.</p>
-----------------------	--	---------------	--

Although there may or may not be specific information that is expected on ethics and law for which positive credit may be available, it needs to be recognised that unethical or illegal advice is a serious issue and that simply scoring 0 on a maximum of 10% of the score for a topic is not an appropriate penalty. As a result, where a candidate advises a client to undertake an illegal act or to take actions which are clearly not ethical they will be penalised by way of a downward adjustment to the score they would otherwise have achieved for this skill. Depending on the circumstances this may result in a fail irrespective of the quality of the rest of the answer. It is expected that it will be rare that this adjustment is applied.

APPENDIX B - THE FORMAT OF LETTERS AND REPORTS

Introduction

Structure is one of the three skills assessed in the Application and Professional Skills paper. The purpose of this note is to provide some further guidance on letters and reports.

Letters and Reports

The APS questions always either require the candidate to produce a letter or require the candidate to produce a report. Reports and letters are not the same thing and it is therefore vital that candidates produce the correct document.

Whilst it is recognised that candidates will be trained to produce letters and reports in the house style for their firm and therefore there is not a single prescribed format required for the exam, it is also clear that significant numbers of candidates would appreciate guidance from us as to how they may be formatted. A different but appropriate presentation is not penalised. For clarity, we have flagged below comments relating to style which are not penalised using STYLE

General Points for both Letters and Reports

1. Abbreviations may be used in the answer. They should be defined on their first use, for example Business Property Relief (“BPR”). There is no need to produce a separate list of abbreviations (although this will not lose credit, it will not gain credit).
2. Full sentences should be used throughout, including when any lists or bullet points are used.
3. Unless the question provides information to the contrary, candidates may assume that the letter/report is covered by the engagement letter and accordingly there is no need to refer to the engagement letter in their answer.

Letters

1. The requirement to produce a letter will only be used in questions where the candidate is advising their client and not for situations where the candidate is, for example, the in-house tax manager.
2. The letter should include the address of the sender, the name and address of the client and the date. Where the address is given in the question, this should be used in the answer. Where the address is not given, “Your address” and “My address” may be used or an address may be invented. Whilst the address of the client should always be at the top of the letter, candidates may if they wish have the details of their firm elsewhere (e.g. the bottom of the first page) as would be the case for headed notepaper – STYLE. In terms of formatting within the constraints of the exam it is likely to be easier to adopt a normal business format of the firm’s address in the top right with the client’s address on the left.
3. Candidates may if they wish include a filing reference, however there is no requirement to do so - STYLE.
4. If the client is referred to by their title throughout the question (for example Mr Brown) or if the title is used in correspondence between adviser and the client (in the Exhibits), the title should be used in the salutation (for example Dear Mr Brown). Normally however, the question will use forenames throughout and the salutation should therefore do this (for example, Dear Alex).
5. After the salutation, there should be a heading appropriate for the content/purpose of the letter.
6. There should then be an introduction briefly setting out the background to the letter and the information on which it is based (for example a letter from the client) and any limitations.

7. Where the letter to and about individuals it should use “you” throughout unless there are two clients (for example husband and wife) in which case for clarity it may be necessary to use their names (for example, David should do X while Mary should do Y). Where the client is a company, the letter should say “the Company should” or “G Ltd should” - STYLE. It should not jump between “I” and “we”.
8. As the letter will be from one person to another, it should be written in the first person, thus, “I/we recommend” not “it is recommended”. STYLE
9. If there are calculations, (for example comparing option A with option B) it may be appropriate for these to be in an enclosure to the letter rather than in the main body of the letter.
10. In the body of the letter, conclusions and recommendations should be drawn out at appropriate points. For example, if a section of the letter considers whether a company should be sold, at the end of that section there should be a conclusion on this point.
11. The letter should include a section summarising the key advice and recommendations. This may either follow the introduction or be at the end of the letter. As the letter is a more personal document than a report, “Conclusions” is likely to be a more appropriate term than “Executive Summary” - STYLE. There should be sufficient information that the recipient can understand the recommendations without reading the detailed analysis. It should not provide new analysis on a particular topic, but may combine or draw together conclusions from the body of the letter. For example, the body of the letter may include sections on two separate points each of which has a conclusion which potentially conflict. The Conclusion may refer to those conclusions and weigh them up in making a final recommendation.
12. There should not be two separate Conclusions sections at the beginning and end of the letter as they are likely to be largely the same and will waste time (although it will not lose credit).
13. The letter should conclude with “Yours sincerely”.

Reports

1. A report will always be required in questions where the candidate is not an adviser in practice (for example, where the candidate is an in-house tax manager). In questions where the candidate is an adviser in practice, a report will often be required.
2. It should start with a heading setting out who the report is to and what is the subject of the report.
3. There is no need to produce a contents page. Although this will not lose credit, it will not gain credit.
4. The introduction should confirm who the report is for and say who may rely on it. It should briefly set out the information on which it is based (for example a letter from the client) and any limitations. The adviser’s name and date of the report may follow this or be at the end of the report. The address may be included.
5. In the body of the report, conclusions and recommendations should be drawn out at appropriate points. For example, if a section of the report considers whether a company should be sold, at the end of that section there should be a conclusion on this point.
6. The Executive Summary summarises the main advice and recommendations. There should be sufficient information so that the recipient can understand the recommendations without reading the detailed analysis. It should not provide new analysis on a particular topic, but may combine or draw together conclusions from the body of the report. For example, the body of the report may include sections on two separate points each of which has a conclusion which potentially conflict. The Executive Summary may refer to those conclusions and weigh them up in making a final recommendation.

7. There should not be a separate Conclusions section at the end of the report as well as the Executive Summary as this is likely to be largely the same and will waste time (although it will not lose credit).
8. Rather than using “you should” the report will normally use the client’s name (for example “Peter should” or “the company should”), particularly where the report is addressed to a group of people (for example the Board of directors) - STYLE.
9. The report may be written in the third person, thus “it is recommended”. Where the report is from a firm of advisers, if the first person is used, “we recommend” will be more appropriate than “I recommend” - STYLE. Whichever form is chosen, it should be used throughout the report.

INCOME TAX - RATES AND THRESHOLDS

	2025/26	2024/25
Rates	%	%
Starting rate for savings income only	0	0
Basic rate for non-savings and savings income only	20	20
Higher rate for non-savings and savings income only	40	40
Additional and trust rate for non-savings and savings income	45	45
Dividend ordinary rate	8.75	8.75
Dividend upper rate	33.75	33.75
Dividend additional rate and trust rate for dividends	39.35	39.35
Thresholds	£	£
Savings income starting rate band	1 – 5,000	1 – 5,000
Basic rate band	1 – 37,700	1 – 37,700
Higher rate band	37,701 – 125,140	37,701 – 125,140
Dividend allowance	500	500
Savings allowance		
– Taxpayer with basic rate income	1,000	1,000
– Taxpayer with higher rate income	500	500
– Taxpayer with additional rate income	Nil	Nil
Scottish Tax Rates⁽¹⁾	%	%
Starter rate	19	19

Intermediate rate	21	21
Higher rate	42	42
Advanced rate	45	45
Top rate	48	48
Scottish Tax Thresholds⁽¹⁾	£	£
Starter rate	1 – 2,827	1 – 2,306
Scottish basic rate	2,828 – 14,921	2,307 – 13,991
Intermediate rate	14,922 – 31,092	13,992 – 31,092
Higher rate	31,093 – 62,430	31,093 – 62,430
Advanced rate	62,431 – 125,140	62,431 – 125,140
Top rate	125,140+	125,140+

INCOME TAX - RELIEFS

	2025/26	2024/25
	£	£
Personal allowance ⁽²⁾	12,570	12,570
Married couple's allowance ⁽³⁾	11,270	11,080
– Maximum income before abatement of relief - £1 for £2	37,700	37,000
– Minimum allowance	4,360	4,280
Transferable Tax allowance for married couples and civil partners ⁽⁴⁾	1,260	1,260
Blind person's allowance	3,130	3,070
Enterprise investment scheme relief limit ⁽⁵⁾	1,000,000	1,000,000
Venture capital trust relief limit	200,000	200,000
Seed enterprise investment scheme relief limit	200,000	200,000
De minimis trusts amount	500	500

- Notes:** (1) Scottish taxpayers pay Scottish income tax on non-savings income.
(2) The personal allowance of any individual with adjusted net income above £100,000 is reduced by £1 for every £2 of adjusted net income above the £100,000 limit.
(3) Only available where at least one partner was born before 6 April 1935. Relief restricted to 10%.
(4) The recipient must not be liable to tax above the basic rate. The recipient is eligible for a tax reduction of 20% of the transferred amount.
(5) The limit is £2 million, where over £1 million is invested in knowledge intensive companies.

TAX TABLES

OTHER INDIRECT TAXES

	2025/26	2024/25
Insurance premium tax⁽¹⁾		
Standard rate	12%	12%
Higher rate	20%	20%

Notes: (1) Premium is tax inclusive ($\frac{3}{28}$ for 12% rate and $\frac{1}{6}$ for 20% rate).

Landfill Tax (pro rated for part tonnes)		
Standard rate	£126.15 per tonne	£103.70 per tonne
Lower rate	£4.05 per tonne	£3.30 per tonne
Landfill Communities Fund (LCF)⁽²⁾	5.3% x landfill tax liability	5.3% x landfill tax liability

Notes: (2) Relief for 90% of qualifying contributions

Aggregates Levy (pro rated for part tonnes)	£2.08 per tonne	£2.03 per tonne
Plastic Packaging Tax (PPT) (pro rated for part tonnes)	£223.69 per tonne	£217.85 per tonne

	2025/26	2024/25
Climate Change Levy (CCL)⁽³⁾		
Electricity	0.775p per kwh	0.775p per kwh
Natural gas	0.775p per kwh	0.775p per kwh
Liquified petroleum gas (LPG)	2.175p per kg	2.175p per kg
Any other taxable commodity	6.064p per kg	6.064p per kg

Carbon Price Support (CPS) rates		
Natural gas	0.331 per kwh	0.331 per kwh
LPG	5.28p per kg	5.28p per kg
Coal & other taxable solid fossil fuels	£1.5479 per GJ on GCV	£1.5479 per GJ on GCV

	From 6pm 30.10.2024	Before 6pm 30.10.2024
Tobacco products duty		
Cigarettes	16.5% x retail price + £334.58 per thousand cigarettes (or £446.67 per thousand cigarettes ⁽⁴⁾)	16.5% x retail price + £316.70 per thousand cigarettes (or £422.80 per thousand cigarettes ⁽⁴⁾)
Cigars	£417.33 per kg	£395.03 per kg
Hand-rolling tobacco	£476.83 per kg	£412.32 per kg
Other smoking/chewing tobacco	£183.49 per kg	£173.68 per kg
Tobacco for heating	£343.91 per kg	£325.53 per kg

Notes: (3) For holders of a Climate Change agreement (CCA), the rate charged is a percentage of the main rate given in the table. For 2025/26 (2024/25 in brackets) for electricity the rate is 8% (8%), for gas it is 11% (11%), for LPG it is 23% (23%) and 11% (11%) for any other taxable commodity

(4) The £446.67/£422.80 per thousand cigarettes is a minimum excise duty (if higher than the first calculation)

6 April 2017 – 5 April 2018	£100,000	6 April 2019 – 5 April 2020	£150,000
6 April 2018 – 5 April 2019	£125,000	6 April 2020 – 5 April 2030	£175,000

Note: (2) An additional nil rate band is available where a main residence is passed on death to a direct descendant. Tapered withdrawal for estates > £2million.

Taper relief

Death within 3 years of gift	Nil%
Between 3 and 4 years	20%
Between 4 and 5 years	40%
Between 5 and 6 years	60%
Between 6 and 7 years	80%

Quick Succession relief

Period between transfers less than one year	100%
Between 1 and 2 years	80%
Between 2 and 3 years	60%
Between 3 and 4 years	40%
Between 4 and 5 years	20%

Lifetime exemptions

Annual exemption	£3,000
Small gifts	£250
Wedding gifts	
Child	£5,000
Grandchild or remoter issue or other party to marriage	£2,500
Other	£1,000

STAMP DUTY/SDRT

Stamp duty⁽³⁾	- On shares transferred by physical stock transfer form	0.5%
Stamp duty reserve tax (SDRT)⁽⁴⁾	- On agreements to transfer shares ⁽²⁾	0.5%
	- On shares transferred to depositary receipt schemes	1.5%

Notes: (3) Does not apply to UK securities traded on a recognised growth market (eg AIM).

(4) Does not apply to units in UK unit trust schemes or shares in UK OEICS bought from fund managers.

STAMP DUTY LAND TAX (SDLT)

Qualifying purchases in a Freeport receive full SDLT relief

CTA EXAMINATIONS

2026

TAX TABLES

Stamp Duty Land Tax on purchase price / lease premium / transfer value – England & NI

From 1 April 2025

Basic Rate % ⁽¹⁾⁽²⁾⁽³⁾⁽⁴⁾	Residential ⁽¹⁾⁽²⁾⁽³⁾⁽⁴⁾	Rate %	Non-Residential
0	£0 - £125,000	0	£0 - £150,000
2	£125,001-£250,000	2	£150,001 - £250,000
5	£250,001 - £925,000	5	£250,001 +
10	£925,001 - £1,500,000		
12	£1,500,001+		

- Notes:** (1) The basic rates are increased by 5% (the 'higher rates') where the purchase is of an additional residential property for individuals. Companies and trusts pay the additional 5% on all purchases of residential properties, subject to Note 2 below.
- (2) Companies (and certain other entities) pay 17% on purchases of residential property valued > £500,000 (subject to exceptions).
- (3) First-time buyers purchasing a single dwelling as their only/main residence may benefit from a reduced rate. (This includes qualifying shared ownership properties.) SDLT will be 0% on the first £300,000, for a property bought for a maximum £500,000 (5% on the excess up to £500,000). No relief is available for a property over £500,000.
- (4) Non-resident individuals and companies will pay an additional 2% surcharge for purchases of residential property. This is in addition to the basic rate, the higher rate (where applicable, in Note 1), and the 17% rate (where applicable, in Note 2).

New leases – Stamp Duty Land Tax on lease rentals – England & NI

Rate (%)	Net present value of rent	
	Residential	Non-residential
0	Up to £125,000	Up to £150,000
1	Excess over £125,000	£150,001-£5m
2	N/A	Over £5m

Land and Buildings Transaction Tax (LBTT) on purchase price – Scotland

2025/26

Basic Rate % ⁽⁵⁾⁽⁶⁾⁽⁷⁾	Residential	Rate % ⁽⁵⁾	Non-Residential
0	up to £145,000	0	£0 - £150,000
2	£145,001 - £250,000	1	£150,001 - £250,000
5	£250,001 - £325,000	5	£250,001 +
10	£325,001 - £750,000		
12	£750,001 +		

- Notes:** (5) Rates are charged on the portion of consideration that falls in each band. The same tax is payable for a premium granted for a land transaction, except for residential leases which are generally exempt. Special rules apply to a premium for non-residential property where the rent exceeds £1,000 a year.
- (6) The 'Additional Dwelling Supplement' (ADS) of 8% of the relevant consideration applies broadly to purchases of an additional dwelling by individuals & trusts (over which the beneficiary has substantial rights) & to purchases of a dwelling by certain businesses, companies & other trusts.
- (7) There is a relief for first-time buyers where a 0% rate is applied to the first £175,000 of the purchase consideration.

New leases – Land and Buildings Transaction Tax (LBTT) on lease rentals - Scotland

Rate (%)	Net present value of rent ⁽⁸⁾
	Non-residential
Zero	Up to £150,000
1%	£150,001 to £2,000,000
2%	£2,000,001+

- Note:** (8) Residential leases are generally exempt

EXAMPLES

Tutorial Note:

As you are no doubt aware, as a result of the abolition of non-domicile status, there have been major changes to the rules on overseas aspects of income tax and capital gains tax.

This area is an important part of the CTA AT IND syllabus and as part of your preparation for the APS IND exam you should make sure you understand these new rules.

In particular we recommend you study the following chapters from your AT IND study manuals:

Personal Income Tax manual:

Ch 46 - The Taxation of Foreign Income – UK Residents

Ch 49 – Employment Income – Internationally Mobile Employees

Ch 52 – The Temporary Repatriation Facility

CGT manual:

Ch 32 – Foreign Aspects of CGT – The FIG Regime

Ch 33 - Foreign Aspects of CGT – Remittances and Rebasing

You may also find it useful to watch the pre-recorded Tax Tutor audio-visual lectures for these chapters in the AT IND course on the Tolley Academy.

You can then attempt the examples which follow below:

Examples 1- 4 test the new rules

Examples 5-7 test the rules relevant to non-resident individuals (these rules have not changed)

Once you feel confident that you understand the new rules, you should attempt Case Study 3.

If you are attending the APS IND taught course please note that we will be using these examples and attempting Case Study 3 on the course.

E1. WILFRED

Wilfred is aged 77 and is retired.

He was born in the UK but left to live in Jamaica when he married his second wife in 1997. His wife died in January 2022 and Wilfred returned permanently to the UK six months later to be near his children and grandchildren from his first marriage. He is UK resident from 1 July 2022. Wilfred lives on his UK pension income and on dividends and gains from his share portfolio.

His income and gains in 2025/26 are as follows:

	£
<u>Income</u>	
UK pension	12,000
UK dividends	40,000
Non-UK dividends	<u>75,000</u>
Total income	<u>127,000</u>
<u>Gains</u>	
UK gains	40,000
UK losses	(12,000)
Non-UK gains	15,000
Non-UK losses	<u>(35,000)</u>
Net losses	<u>8,000</u>

Requirement:

- a) Briefly explain whether Wilfred is eligible for FIG relief in 2025/26.
- b) Show Wilfred's net taxable income and net taxable gains in 2025/26, assuming all appropriate claims are made.

E2. EVA

Eva came to the UK in May 2025 to work as an advertising executive for a French cosmetics company. She was UK resident from her first UK workday which was 5 May 2025. She had never previously been UK resident.

Eva's taxable earnings in 2025/26 were £930,000.

Most of Eva's employment duties are carried out in the UK, but she spends some time working in the company's head office in Paris. Her e-diary for 2025/26 showed that she had 229 workdays of which 77 were outside the UK.

Requirement:

Calculate Eva's UK taxable income for 2025/26, assuming all beneficial claims for relief are made.

E3. XI

Xi is a Chinese national who came to the UK in June 2023 to work as a civil engineer. Before that he had worked in Japan for 15 years. He used the remittance basis in 2023/24 and 2024/25.

His non-UK income consisted of property income from his apartment in Japan which he previously rented out but which was sold in March 2025. The rental income was paid into his bank account in Japan and was not remitted to the UK.

Xi also has a small portfolio of shares in companies listed on the Hong Kong stock exchange, the dividends from which are paid into a bank account in China.

Xi's income in 2025/26 is as below:

	£
UK employment income	90,000
UK bank interest	100
Chinese bank interest	350
Dividends on Hong Kong share portfolio	8,000

In 2025/26, Xi transferred £25,000 of property income from his bank in Japan to the UK.

Requirement:

Calculate Xi's UK tax liability for 2025/26 assuming all appropriate claims are made.

E4. JAMAL

Jamal was born in and grew up in Hakimstan. After graduating from college in Hakimstan, Jamal started a job as a trainee accountant in Manchester in May 2021.

He has lived in the UK ever since.

Jamal's grandfather died in Hakimstan in December 2015 leaving him substantial investments including a portfolio of shares and a large residential property in Hakimstan. In order to protect his overseas investment income from UK tax, Jamal claimed the remittance basis in 2023/24 and 2024/25.

The share portfolio was valued at £1 million on his grandfather's death and £900,000 in April 2017. Jamal sold the shares in August 2025 for £800,000 million and paid the proceeds into his bank account in Hakimstan.

The house in Hakimstan was valued at £1.2 million on his grandfather's death and £1.5 million in April 2017. Jamal sold the house in September 2025 for £1.75 million and paid the proceeds into his bank account in Hakimstan. Jamal is a higher rate taxpayer.

Requirement:

Calculate the UK chargeable gain arising in 2025/26.

How would your answer differ if Jamal had first become UK resident in May 2022?

E5. ANTONIO

Antonio is resident in Portugal. He owns a property in the UK from which he has rental income (after expenses) of £25,000 per annum.

He also has a UK bank account on which he received interest of £1,200 in 2025/26.

He receives dividends of £18,000 per annum on his UK share portfolio.

Requirement:

Calculate Antonio’s UK income tax liability for 2025/26.

E6. ZAINAB

Zainab is a doctor. She had always been UK resident until she left the UK in January 2021 to take a job at a hospital in Pakistan. She started full-time work in Pakistan on 1 February 2021. Zainab returned to the UK in September 2025 and resumed her UK practice work on 1 October 2025. She is a higher rate taxpayer in the UK.

Her record of asset sales has been as follows:

Asset	Location of asset	Date of sale	Date of acquisition	Gain / (Loss) £
Asset A	Non-UK	1.11.22	1.12.14	30,000
Asset B	UK	1.11.22	1.9.20	(12,000)
Asset C	UK	1.6.24	1.4.23	(5,000)
Asset D	Non-UK	1.3.26	1.8.23	25,000

Calculate the CGT payable by Zainab for 2025/26.

E7. WESLEY

Wesley Dale is not resident in the UK and has never lived there.

He inherited two UK-situs assets from his godfather on 1 October 2014, a cottage in Kent and a small industrial unit in Surrey, valued at the date of his godfather’s death at £310,000 and £150,0000 respectively.

On 30 September 2025 he sold the cottage for £430,000 and the industrial unit for £280,000.

The values at 5 April 2015 and 5 April 2019 are as follows:

	April 2015 £	April 2019 £
Cottage	350,000	375,000
Industrial unit	200,000	272,000

Wesley has no other UK assets and no UK income.

Calculate the UK CGT payable by Wesley in 2025/26 and show when any tax would be payable.

ANSWERS TO EXAMPLES**E1. WILFRED**

a)

Wilfred became UK resident in 2022/23. He is entitled to FIG relief in 2025/26 as he was non-UK resident in the ten tax years before 2022/23 and 2025/26 is one of the first four years of subsequent residence.

b)

A FIG relief claim for foreign income in 2025/26 will be beneficial in order to protect his foreign dividends from being taxed in the UK (predominantly at 33.75%). Although he would forfeit his PA, this is not an issue as the PA would be tapered to zero in any case as his income exceeds £125,140.

His net taxable income in 2025/26 will therefore be his UK income only being £52,000.

As a FIG relief claim for income will be made, Wilfred will lose his CGT AEA (regardless of whether or not he makes a foreign gain claim).

A FIG relief claim for income will also mean that his non-UK capital losses will be disallowed.

Wilfred should therefore also make a FIG relief claim for foreign gains (as otherwise the foreign gain of £15,000 would be taxable in 2025/26).

His net taxable gains in 2025/26 will therefore be £28,000.

E2. EVA

OWR is available in 2025/26 as Eva had been non-UK resident for at least ten tax years prior to becoming UK resident.

Earnings attributable to foreign duties are: $£930,000 \times 77/229 = \underline{£312,707}$

We test this against the annual financial limit which is the lower of:

- a. $£930,000 \times 30\% = £279,000$; or
- b. $£300,000$.

OWR for 2025/26 is therefore £279,000.

Eva's UK taxable income for 2025/26 is: $£(930,000 - 279,000) = \underline{£651,000}$

As with any FIG relief claim, if Eva makes an OWR election for 2025/26, she will lose entitlement to personal allowances as well AEA for capital gains for 2025/26.

Note also that due to the annual financial limit for OWR, even if Eva makes an OWR claim, $£312,707 - £279,000 = £33,707$ of her foreign earnings will still be taxed in the UK. In this case, relief for foreign taxes would be available on this amount.

E3. XI

Xi is entitled to FIG relief in 2025/26 as he is a qualifying new resident.

However, he should not claim the relief because his foreign income is less than his UK personal allowance and is partly covered by the savings and dividend allowances. He should therefore pay UK tax on this income on an arising basis.

Xi should designate £25,000 of his unremitted foreign income to be subject to the TRF. This means that the amount designated would then be taxed at 12% (instead of the remitted amount being taxed at 40% / 45%).

As amounts designated under the TRF are not treated as income, this does not act to reduce his PAs in 2025/26.

Income tax computation 2025/26:

	Non-savings £	Interest £	Dividends £
UK employment income	90,000		
UK bank interest		100	
Chinese bank interest		350	
Dividends on Hong Kong shares			<u>8,000</u>
	<u>90,000</u>	<u>450</u>	<u>8,000</u>
Less: Personal allowance	<u>(12,570)</u>		
Taxable income	<u>77,430</u>	<u>450</u>	<u>8,000</u>
Tax:			
37,700 @ 20%			7,540
39,730 @ 40%			15,892
450 @ 0%			0
500 @ 0%			0
7,500 @ 33.75%			<u>2,531</u>
			25,963
Add: Tax under the TRF (£25,000 @ 12%)			<u>3,000</u>
Tax liability 2025/26			<u>28,963</u>

E4. JAMAL

Jamal is UK resident and is chargeable to UK tax on his worldwide income and gains in 2025/26.

He is a qualifying new resident in 2021/22 as this is his first tax year of UK residence. But he cannot access the FIG regime in 2025/26 as this is not within his first 4 tax years of UK residence.

Jamal claimed the remittance basis in 2023/24 and 2024/25. 'Rebasing' is available to former remittance basis users who held foreign assets at 5 April 2017 and who sell those assets on or after 6 April 2025. Jamal will be entitled to rebasing in relation to sales of non-UK assets held at 5 April 2017.

However, Jamal should elect to disapply rebasing on the disposal of the shares as using the original cost (probate value) gives a bigger allowable loss.

The allowable loss on the sale of the share portfolio is:

	£
Proceeds	800,000
Less: Cost	<u>(1,000,000)</u>
Allowable loss	<u>(200,000)</u>

The UK chargeable gain on the sale of the house in 2025/26 is:

	£
Proceeds	1,750,000
Less: Value at 5 April 2017	<u>(1,500,000)</u>
Chargeable gain	<u>250,000</u>

The net gain of £250,000 - £200,000 = £50,000, after deduction of the AEA will be taxed at 24% as Jamal is a higher rate taxpayer.

If Jamal first becomes UK resident in May 2022, then 2025/26 will be his fourth tax year of UK residence and he will be eligible for FIG relief. As he has previously claimed the remittance basis, he will also be eligible for April 2017 rebasing.

If Jamal claims FIG relief, for his gain on the property, he will not be charged to UK CGT on the gain. As a result of making a FIG claim, the foreign capital loss on the shares will not be allowable. This loss cannot therefore be deducted from UK or non-UK chargeable gains in 2025/26 or carried forward for relief in future years. Jamal will also lose his personal allowance, increasing his income tax liability by £5,028 (£12,570 @ 40%).

Assuming Jamal makes a claim for FIG relief, rebasing of the property becomes immaterial.

E5. ANTONIO

His UK income tax liability in 2025/26 will be determined by s.811 ITA 2007 as follows:

	£
Tax treated as paid on UK dividends (18,000 @ 8.75%)	1,575
Plus: Tax in respect of other UK income (ignoring PAs)	
– UK rents (£25,000 @ 20%)	<u>5,000</u>
Maximum UK tax liability	6,575
Less: Tax treated as deducted from UK dividends	<u>(1,575)</u>
UK tax payable	<u>5,000</u>

There will be no liability in respect of the bank interest or any upper rate tax on the dividends. However, Antonio will not be able to deduct the UK personal allowance when calculating the tax due in respect of the rental income.

Alternatively, Antonio's tax liability for 2025/26 could be calculated under normal rules:

	Non-savings £	Interest £	Dividends £
Rental income	25,000		
Interest		1,200	
Dividends			<u>18,000</u>
	<u>25,000</u>	<u>1,200</u>	<u>18,000</u>
Less: Personal allowance	<u>(12,570)</u>		
Taxable income	<u>12,430</u>	<u>1,200</u>	<u>18,000</u>
Tax			
12,430 @ 20%			2,486
1,000 @ 0%			Nil
200 @ 20%			40
500 @ 0%			Nil
17,500 @ 8.75%			<u>1,531</u>
Tax liability			4,057
Less: Tax treated as deducted from UK dividends			<u>(1,575)</u>
UK tax payable			<u>2,482</u>

In this case, it is beneficial for Antonio to claim the personal allowance and have UK tax payable of £2,482.

E6. ZAINAB

The temporary non-resident (TNR) rules apply to Zainab as:

- She was non-UK resident for less than five years. The non-resident period runs from 1 February 2021 to 1 October 2025 as both the years of departure and return are split years under the SRT (Case 1 and Case 5 respectively); and
- She was UK resident for at least four of the seven years before becoming non-resident.

Gains 2025/26:

	Note	Gains £
Asset A	1	30,000
Asset B	2	(12,000)
Asset C	3	Nil
Asset D	4	<u>25,000</u>
Chargeable gains		<u>43,000</u>
Less: AEA		<u>(3,000)</u>
Taxable		<u>40,000</u>
CGT @ 24%		<u>9,600</u>

Notes:

1. Asset A is within the TNR rules as it was held at 1 February 2021. The gain of £30,000 is therefore taxed in the year of return (2025/26).
2. Asset B is within the rules for the same reason. The loss on the sale of Asset B is therefore an allowable loss which can be set against gains chargeable in the year of return.
3. Asset C is not within the rules as it was acquired during the TNR period. The loss is not therefore allowable (this is because a gain in this situation would not be chargeable).
4. Asset D was sold in the UK resident part of 2025/26 and is therefore taxable on an arising basis (not under the TNR rules). Its date of acquisition is irrelevant. Even though this is a disposal of a foreign asset, the gain is fully chargeable as Zainab cannot claim FIG relief (she was not non-UK resident in the ten years before 2025/26).

E7. WESLEY

Wesley is non-UK resident and therefore the disposal of the cottage and the industrial unit in September 2025 falls under the non-resident capital gains (NRCG) rules.

Cottagei. Using the 'default' method:

	£
Proceeds	430,000
Less: MV at April 2015	<u>(350,000)</u>
Gain	<u>80,000</u>

ii. Using the 'time-apportionment' method:

	£
Proceeds	430,000
Less: Cost (MV at October 2014)	<u>(310,000)</u>
Gain	120,000
Less: Pre-April 2015 element ($£120,000 \times 6/132$)	<u>(5,455)</u>
Apportioned gain	<u>114,545</u>

The default method therefore applies.

Industrial unitUsing the 'default' method:

	£
Proceeds	280,000
Less: MV at April 2019	<u>(272,000)</u>
Gain	<u>8,000</u>

There is no time-apportionment option in respect of non-residential property.

CGT payable 2025/26:

	Gains
	£
Cottage	80,000
Industrial unit	8,000
Less: Annual exempt amount	<u>(3,000)</u>
Taxable gains	<u>85,000</u>

CGT:

£37,700 @ 18%	6,786
£47,300 @ 24%	<u>11,352</u>
	<u>18,138</u>

The CGT is payable no later than 60 days from the date of completion of each disposal (in this case by 29 November 2025).

CASE STUDIES

1. You are a Tax Senior in a firm of Chartered Tax Advisers. Julia Anderson has been a client of your firm for many years.

Julia has emailed your Tax Manager, Chikondi Phiri, requesting tax advice in relation to her future plans (**EXHIBIT A**).

Julia has included further information in an attachment to her email (**EXHIBIT B**).

The following exhibits are provided to assist you:

EXHIBIT A: Email from Julia Anderson

EXHIBIT B: Attachment to email from Julia Anderson

EXHIBIT C: Pre-seen information

Requirement:

Prepare a draft report advising Julia Anderson on the issues raised in her email and recommending the best way to structure her tax affairs going forward.

EXHIBIT AEmail from Julia Anderson

From: Julie Anderson
To: Chikondi Phiri
Date: 30 April 2026
Subject: Tax Advice

Dear Chikondi,

I would like to let you know of some changes which I believe may impact my tax position. I will be having major work carried out at 2 Orchard Way, Poole, before signing a new commercial lease. I am also buying a new property at 7 High Street, Coventry. Details are as follows:

2 Orchard Way, Poole

As you know, the long-term tenant moved out of this property on 31 March 2023 and it has been empty since, as I had been unable to find suitable new tenants.

Recently I received an enquiry from a major logistics company who feel the unit is in an ideal location for micro warehousing and storage for onward delivery, as it is close to the port and motorway. However, it is not in a suitable condition at present and needs brought up to specification. Before the letting starts, I am going to have some building work carried out to adapt and modernise the building, and make it more secure. This will cost £200,000, but the estate agent is clear that this should make the unit both easier to rent out and sell as there is a shortage of this type of commercial property and increasing demand. The quantity surveyor's report indicates none of this expenditure would be eligible for capital allowances.

I have recently had both 2 Orchard Way and my residence at 15 Round Road valued. It is anticipated that once complete, the work at 2 Orchard Way will add £200,000 to the value of the property, so it should pay for itself. I have attached a copy of the property valuation report covering 2 Orchard Way and 15 Round Road along with a breakdown of the projected income and expenses from the letting of 2 Orchard Way (**EXHIBIT B**).

Letting the unit will bring in around £34,000 profit each year, ignoring any loan interest charges. As I have been able to live comfortably on just my salary whilst the property was vacant, this income is not likely to be needed for spending, and so would like to set this aside so that it can be used to supplement my income post-retirement.

7 High Street, Coventry

As part of my employment, I spend one week every month working in Coventry. Currently, my employer covers all costs of accommodation and travel relating to this, because my workplace in Coventry is 100 miles away from my normal workplace in Bristol.

From 1 September 2026 my son Steven will be attending University in Coventry.

As a result of both of the above, I have decided to buy a house in Coventry; 7 High Street. Whilst I have considered having the property in Steven's name by way of either gift or a trust arrangement, it feels unfair to my daughter to make provision for only Steven now. Therefore, I will be making the purchase in my own name.

My offer of £250,000 for this property has been accepted by the seller. I expect house prices in Coventry to rise substantially over the next few years, due to planned infrastructure improvements in the area, so I believe buying the house will turn out to be a good financial decision.

7 High Street has four bedrooms. Steven will use one room and, depending on your advice, I will also use one bedroom myself if I stay at the house while working in Coventry. I will let the spare bedrooms to students at a rent of £500 per month for each room. Steven is not very good with money and therefore I am considering charging him the same rent as the other students. If I do so, I will put aside all the money he pays me to give back to him after he graduates.

Therefore, if I stay at the house there will be two rooms to let; if I don't stay, there will be three rooms to let.

If I stay at 7 High Street while working in Coventry, my employer will pay me a round sum allowance of £500 per month instead of paying for my hotel accommodation as they have done previously. Otherwise, they will continue to pay for my hotel accommodation. My travel costs to drive to Coventry and back will still be covered by my employer at 45 pence per mile regardless of where I stay while there.

I anticipate that my allowable expenses relating to the rental will be £3,000 per year (not including mortgage interest). This amount will not change significantly regardless of whether I stay at 7 High Street, because the tenants will each be responsible for paying their own portion of council tax and utility bills.

I would like your advice on whether I would be better off with the £6,000 round sum allowance from my employer, or the £6,000 I would get from renting the extra room at 7 High Street, once income tax and National Insurance contributions are taken into account.

Funding

The purchase of 7 High Street and the refurbishment of 2 Orchard Way will cost £450,000 in total. I will use the funds in my ISA account to pay £250,000 towards this and will raise a further £200,000 through a mortgage. I will pay any additional acquisition costs from my savings.

The interest rate on the mortgage will be fixed for the next five years. I anticipate that I will repay the mortgage within the five-year fixed rate period by selling 2 Orchard Way.

My mortgage adviser has offered me a choice of mortgage that can be secured against either 7 High Street or 2 Orchard Way, with the mortgage against High Street being a little cheaper at 4% per annum, as opposed to the Orchard Way mortgage being 5%. I am minded to go with the cheaper option, but will await your advice before confirming with my adviser.

Kind regards

Julia

EXHIBIT BAttachment to email from Julia AndersonExtract from Valuation Reports

2. You are a Tax Manager in a firm of Chartered Tax Advisers. Your Tax Partner, Sally Jones, recently met with new clients Jack Clarke and Steffi Meyer (see **EXHIBIT A**). Jack and Steffi are engaged and have set a wedding date for 2 September 2027.

Jack has a child, Oscar, from his previous relationship with Morela Laska. Currently, Jack, Steffi and Oscar live in the property which Jack bought with Morela. Steffi lets out her former home.

Jack and Steffi are keen to buy a new home together and they wish to structure their tax affairs in the most efficient way both before and after their marriage.

The following exhibits are provided to assist you:

EXHIBIT A: Notes of a meeting with Jack and Steffi

EXHIBIT B: Extract from Jack Clarke and Morela Laska's separation contract

EXHIBIT C: Email from Jack

EXHIBIT D: Pre-seen information

Requirement:

Prepare a draft report for review by your Sally Jones advising Jack and Steffi on their proposed property transactions and general tax planning given their forthcoming marriage.

EXHIBIT ANotes of a meeting with Jack and Steffi

Present: Sally Jones, Jack Clarke, Steffi Meyer
 Date: 30 October 2026

Jack and Steffi are new clients. They have been in a relationship for six years. They currently live together in Jack's home, The Old Rectory, with Jack's son, Oscar.

Jack originally bought The Old Rectory in March 2010 with his ex-partner, Morela. Jack and Morela were not married, but they lived together in The Old Rectory as their main residence from the date of purchase. They separated five years later, in March 2015, at which point Morela moved out of The Old Rectory and into nearby rented accommodation. However, because Jack did not have the financial means to buy Morela's share of the property, a contract was made such that, out of the two of them, only Jack could remain living in the house. The contract did not create a trust. A copy of the contract was provided in the meeting (**EXHIBIT B**).

Steffi moved in with Jack in December 2023. Steffi's former home, 22 Westland Road, was empty for a while but has been let at £1,250 per month since December 2024. However, this arrangement has caused tension with Morela, so Jack and Steffi would like to buy a new home together as soon as possible and downsize from The Old Rectory. In addition, they would like to move closer to where Oscar wants to study for his A Levels.

Jack and Steffi have obtained valuations of their properties as follows:

<u>Property</u>	<u>Market value</u>
	£
The Old Rectory	900,000
22 Westland Road	440,000

There is no expectation of a material change in these values over the next year or so.

Jack and Steffi consider that they have two options to fund the purchase of their new property, for which they have a budget of up to £450,000:

- 1) Sell The Old Rectory and use Jack's share of the proceeds to purchase the new property. Steffi would continue to let 22 Westland Road.
- 2) Sell 22 Westland Road and put the proceeds towards buying their new home (they would then top-up with savings if needed). The Old Rectory would then be sold. £400,000 of Jack's share of the proceeds from the sale of The Old Rectory would be invested in a further buy-to-let property. The remaining £50,000 would be invested in a savings account.

They would like advice as to which option is cheapest from a tax perspective and whether it will make a difference if the transactions take place before or after their marriage.

They would also like advice on mitigating their overall exposure to Income Tax and Inheritance Tax.

Jack and Steffi are happy to pool their income and assets, but they have made arrangements to protect their own interests as well as those of any beneficiaries, including Oscar, in the event of their separation or the death of either of them. No advice is required on this point.

EXHIBIT BExtract from Jack Clarke and Morela Laska's separation contract

Dated this Ninth day of March 2015.

The Old Rectory:

- (a) Mr Clarke shall be entitled to occupy the property registered at HM Land Registry under title number CE7535487 ('The Old Rectory') rent free to the exclusion of Ms Laska until the determining event (as hereafter defined);
- (b) Subject to paragraph (c), the property shall not be sold until the first to happen of the following events ("the determining event"), namely:
 - (i) The surviving child of the parties attaining the age of eighteen years; or
 - (ii) The death of either party; or
 - (iii) The remarriage of either party.
- (c) Paragraph (b) above can be set aside with prior written consent of both parties.
- (d) Mr Clarke undertakes to indemnify Ms Laska as to 50% of her liability for Capital Gains Tax consequent upon sale of The Old Rectory.

EXHIBIT CEmail from Jack

To: Sally Jones
From: Jack Clarke
Date: 2 November 2026
Subject: Morela's income

Dear Sally

Thanks for your time the other day.

You asked me to provide information on Morela's financial circumstances in case it is relevant to the report you will be drafting.

She has informed me that her current salary is £32,000 per annum and that she has a small amount of annual building society interest (about £200).

Her salary for 2027/28 will be higher (around £55,000) as her boss is retiring in March 2027 so she will be promoted.

She does not own any other assets apart from her share of The Old Rectory and some cash savings.

Kind regards

Jack

EXHIBIT DPre-seen informationJack Clarke and Steffi Meyer - Background InformationJack Clarke

Date of birth:	3 January 1986
Place of birth:	Scarborough, UK
Address:	The Old Rectory, Pucklechurch, South Gloucestershire, UK

Purchase date:	March 2019
Cost:	£280,000

Pension provision

Jack is auto-enrolled into his company pension scheme and pays 2.5% of his salary into his pension. Steffi does not have a pension.

3. You work for Prestige Tax Solutions LLP.

Your Tax Director, Andrew Townsend, has just had a meeting with clients Jan Ewary and Augustus Novak

The following Exhibits are attached to assist you.

EXHIBIT A: Notes from meeting with Jan and Augustus dated 1 May 2026

EXHIBIT B: Information pertaining to Augustus Novak and Jan Ewary dated 7 May 2026

EXHIBIT C: Email from Jan Ewary and Augustus Novak dated 15 May 2026

EXHIBIT D: Pre-seen information

Requirement:

Draft a report to Jan and Augustus for Andrew Townsend to review advising the clients on how best to fund the purchase of their home in the UK and responding to their additional requests in their email.

Assume you are writing on 31 May 2026.

EXHIBIT ANotes from meeting with Jan and Augustus dated 1 May 2026

I have just met with clients Jan and her boyfriend Augustus.

They are a delightful young couple who are both management consultants. They were both born and raised in Octlandia. They have an interest in modern art and first met at an exhibition in an art gallery in Octlandia in 2018.

Both Jan and Augustus were keen to move to London and enjoy the culture of the city and in particular the opportunity to expand their interest in modern art.

Jan and Augustus moved to the UK on 1 March 2024. They took on full time roles as management consultants in London on 6 April 2024 and became UK resident from that date. All of their workdays are spent in the UK.

They are currently living together in a rented flat in London.

Jan and Augustus are now looking to buy a house in London. They have set themselves a budget of £1m. They want to purchase the house entirely from their Octlandian bank accounts. (Their UK salaries are being used to cover their day-to-day living expenses).

They want advice on how much to transfer from each of their accounts to achieve their budget of £1m whilst minimising any tax payable on the amounts remitted. Whilst ideally, they would like to fund the purchase on a 50/50 basis, they are mindful of the tax costs and so will likely follow the most tax efficient route.

I have requested further information from each of them including up-to-date copies of their Octlandian bank statements.

You should be aware that:

- Octlandia has a 20% withholding tax for non-residents on property income in Octlandia, but no withholding tax on any other source of income.
- There is no capital gains tax in Octlandia.
- There is no double tax treaty between Octlandia and the UK.

EXHIBIT BInformation pertaining to Augustus Novak dated 7 May 2026

Augustus has a UK salary (including benefits) of £130,000 per annum.

Augustus became UK resident on 6 April 2024. He had never been to the UK previously other than for short holidays. Augustus claimed to use the remittance basis in 2024/25.

Augustus's bank statements for his Octlandian bank account show the following:

Date	Source	Amount credited
1.3.24	Balance	235,000
15.5.24	Capital proceeds on house sale (N1)	200,000
31.12.24	Interest	5,000
7.6.25	Capital proceeds on sale of shares (N2)	30,000
21.12.25	Interest	8,000
May 2026	Balance	£478,000

(N1) In May 2024, Augustus sold a house in Octlandia for £200,000. He had inherited it from his grandfather when he died in 2015 and the probate value was £125,000. Its April 2017 value was £150,000. Augustus had never lived in the house.

(N2) In June 2025, he sold his shareholding in DecCo Ltd, an Octlandian company for £30,000. He had also inherited these shares on his grandfather's death in 2015. The probate value was £10,000. Their April 2017 value was £12,000. He has not received any dividends since 2023.

Information pertaining to Jan Ewary dated 7 May 2026

Jan has a UK salary (including benefits) of £150,000 per annum.

Jan became UK resident on 6 April 2024.

Jan had been on a full time 3-year work secondment in the UK from 1 January 2019 to 31 December 2021.

Jan claimed to use the remittance basis in 2024/25 only.

Jan has a non interest bearing Octlandian bank account. Her bank statement for this account shows the following:

Date	Source	Amount credited
1.3.24	Balance	410,000
1.5.24	Rent (N1)	12,000
1.11.24	Rent (N1)	12,000
1.5.25	Rent (N1)	12,000
1.11.25	Capital proceeds on house sale (N2)	400,000
10.3.26	Capital proceeds on sale of sculpture (N3)	150,000
May 2026	Balance	£996,000

(N1) Jan owned an investment property in Octlandia. She received rent of £2,000 per month. Octlandia deducts 20% tax at source on rental income paid to non-residents.

(N2) Jan sold the investment property on 1 November 2025 for £400,000. She had bought it in May 2010 for £100,000. On 5 April 2017, the house was worth £250,000. She has never lived in the house.

(N3) Jan sold a sculpture in March 2026 for £150,000. It had been bought in March 2015 for £200,000 and it was worth £180,000 in April 2017. She has always kept it in Octlandia.

EXHIBIT CE-mail

To: Andrew Townsend
From: Jan Ewary and Augustus Novak
Date: 15 May 2026
Subject: Purchase of UK property

Hello Andrew

We hope you are well?

We have just come back for viewing a property in Hampstead, which seems perfect!

It is a large 3-storey townhouse with close links to central London.

It is on the market for £925,000, but the estate agent is convinced that if we put in a cash offer of £900,000 it will get accepted. We know there will be Stamp Duty Land Tax to pay on the property but we presume we will qualify for first-time buyer's relief so that should minimise the amount due! Please can you give us an estimate of this tax?

The top storey of the house has been converted into a self-contained flat, so we are thinking that after we have moved in, we might rent out the top floor. The estate agent advised that we could probably charge around £20,000 p.a.

The agent has suggested that before renting it, we give the place a bit of a tidy up. He says a fresh coat of paint will make all the difference! The kitchen and bathroom are fully fitted, though we will need to replace some of the kitchen units which are damaged. We would also need to buy some furniture for the living space.

Can you please advise on any tax implications of us renting out the top floor? We appreciate that you will not be able to do detailed calculations at this stage.

We look forward to hearing from you.

All the best

Jan and Augustus

ANSWERS TO CASE STUDIES

1. JULIA ANDERSON

REPORT

From: Chartered Tax Advisers LLP
To: Julia Anderson
Date: 6 May 2026
Subject: Property Taxation Issues

A. INTRODUCTION

This Report is prepared for Julia Anderson ('you').

The Report is based on information provided by you in your email to Chikondi Phiri on 30 April 2026 and information held in our files.

The Report is based on legislation in force on today's date.

The Report considers the taxation implications relating to:

- 1) 2 Orchard Way, Poole ('Orchard Way'), including the tax issues arising on the rental income, the tax treatment of mortgage interest and tax on the eventual sale of the property;
- 2) 7 High Street, Coventry ('High Street'), including an analysis of the tax outcome of mortgaging against this property and an assessment of whether you should stay there while working in Coventry.

The Report is intended solely for use by you. No liability is accepted for any reliance on this Report by other parties.

B. EXECUTIVE SUMMARY

- Mortgage interest is tax deductible if you borrow for the purpose of commercial lettings. It is recommended that you borrow the amount to refurbish Orchard Way, as you will save £2,200 each year compared to if the funds are borrowed to purchase High Street.
- The annual receipt of either a £6,000 allowance from your employer, or an additional £6,000 of rental income for High Street, will both be taxable at the same rate. However, an additional £120 per annum in National Insurance Contributions (NIC) is payable if the £6,000 is received from your employer.
- Staying at High Street would enable you to elect for this property to be treated as your main residence, potentially exempting part of any gain from capital gains tax on a future sale. The election can be made within two years of a change in your combination of residences and therefore, it is recommended that you stay at High Street to give you the option to make the election in due course if the increase in value materialises.
- You should not have your son pay you rent for the use of this property.
- Subject to taking appropriate financial advice, you may consider making increased personal pension contributions either now or in the future if your total income rises above £100,000 to take advantage of available tax relief.

C. 2 ORCHARD WAY, POOLE**(C1) Tax relief on mortgage interest**

You will borrow £200,000 to fund either the purchase of High Street or the refurbishment of Orchard Way. The mortgage could be secured against either property. You will pay interest at 5%, which is £10,000 per year, if the loan is secured against Orchard Way and used to fund the refurbishment. If the mortgage is used to fund the purchase of High Street, you will pay interest at 4%, which is £8,000 per year. You are minded to opt for the lower finance cost.

The tax treatment of the mortgage interest payments depends on the type of rental it relates to.

Mortgage interest is generally not allowable as a deduction when calculating residential rental profits. Instead, you are given a tax credit of 20% of the mortgage interest. If you borrow against High Street, your tax reduction will be a maximum of £1,600.

These mortgage interest restrictions do not apply to commercial lettings. Therefore, when calculating taxable profits on Orchard Way loan interest can be deducted when calculating rental profits, provided the interest relates to a loan taken out for the purpose of providing this property for rental. A loan to pay for the refurbishment of Orchard Way would meet this criterion.

You will save £2,200 per year by borrowing against Orchard Way rather than High Street (see Appendix 1).

(C2) Tax on sale of 2 Orchard Way

The costs of repairs to a rental property are usually deductible against rents. The cost of improvements or alterations is treated as enhancement expenditure on the property and is instead deductible against capital gains on sale.

You are proposing to adapt and modernise the unit to make it suitable for use by the proposed tenant. These costs would be capital in nature as they will be reflected in the value of the property on sale. Therefore, we have assumed that the entire £200,000 building expense is capital and will form part of the allowable cost on disposal of the property.

Based on the expected market value of £550,000 and cost of £300,000 (100,000 + 200,000), Orchard Way will be standing at a gain of £250,000. CGT is charged on disposals at 18% on gains which fall within the basic rate tax band and 24% on gains above the basic rate. However, as at present your employment income utilises all of your basic rate band, it is assumed none would be available on a future sale.

Based on current rates, CGT will be £59,280 (£250,000 – £3,000 = £247,000 × 24%). This will be lower if you have some of your basic rate band available in the year of sale.

D. 7 HIGH STREET, COVENTRY**(D1) Employment Expenses**

You work for one week each month in Coventry, but your normal workplace is in Bristol.

Because you spend less than 40% of your working time in Coventry, it is classed as a temporary workplace, so you are not taxed on the travel and accommodation costs paid or reimbursed by your employer.

If you stay at High Street, the additional allowance your employer pays will form part of your salary and will be subject to tax and NIC (this payment is not reimbursing any specific allowable expenses).

Employment expenses are allowable if they are incurred wholly, exclusively and necessarily in the performance of your employment duties. You can claim a deduction from earnings for any qualifying expenses met from your own pocket, or any travel and accommodation costs that are not reimbursed by your employer.

The allowable costs of travel include accommodation and meals while away on business. If you stay at High Street, you should keep records of the amounts you spend on meals and any additional household expenses (including a portion of utility bills) incurred while staying at the property for employment reasons.

However any mortgage interest relating to High Street is not deductible as a work expense because the amount payable is not directly affected by your employment.

The mileage allowance paid by your employer for business travel is not taxable providing the mileage does not exceed 10,000 miles per year. If you travel more than 10,000 miles, any amounts reimbursed over 25p per mile are taxable.

If you do not stay at High Street, you will instead be able to let an additional room, for which you will receive £500 per month (£6,000 per year).

Although this is the same amount as your employer will pay you if you stay at High Street (and is taxed at the same rates), there is an advantage to having £6,000 of rental income for letting the room rather than receiving additional employment income because employment income is subject to NIC and rental income is not.

Your salary is currently £4,892 per month. On the basis the allowance would be paid to you monthly, £500 would be subject to NI at 2%. This amounts to an additional £120 each year and is deducted via payroll.

Any employment expenses you meet personally for which tax relief is claimed will not reduce your earnings for NIC purposes.

You expect these expenses to amount to £3,000 each year, regardless of whether you are living at the property or not. If you live in the property, expenses such as repairs or insurance may need to be apportioned because any portion which relates to your own occupation of the property (or your son's if he is not charged rent) cannot be deducted from rental profit.

You may instead be able to claim a deduction against employment income. For the purpose of forecasting your taxable income, it has been assumed that the entire £3,000 of expenses will be deductible, either against rental or against employment income.

(D2) Rent paid by your son

Any rent your son pays will be taxable on you as rental income. Your effective tax rate on this is likely to be 61% due to the income falling within the margins where you lose the benefit of your personal allowance.

As you intend to give the money back to your son, to avoid this tax charge, you should not charge your son rent but instead look at other ways to encourage him to save. All calculations in this report assume that you will not receive rents from your son.

Any expenses relating to your son will not be tax deductible if he does not pay any rent.

(D3) Rent-a-room Relief

When letting out rooms in a property, which is your main home, to tenants, there is a special tax relief, which can exempt gross rents of up to £7,500 from tax. If the rental from the property exceeds £7,500, as it would in your case, then the taxpayer is able to set £7,500 off as an expense (instead of the actual expenses). However, this is only available if the property being rented out is your main residence.

Even though you would be living at High Street for one week each month, you would not be able to claim rent-a-room relief as your main home remains your residence in Bristol, as that is where you spend most of your time. This would be the case even if you were to make an election to treat High Street as your main residence for capital gains tax purposes (explained below) as the criteria to be able to treat the property as your main home for rent-a-room relief is based on a purely factual basis.

(D4) Pension contributions

You will be in receipt of substantial extra annual income from the property lettings. Whilst you have not been advised of the capital repayments you have to make on the mortgage (on the basis it is not an interest-only mortgage), you may have surplus income which you do not require to meet additional expenses or liabilities.

If this is the case, then you may be considering how best to invest these funds. We are not authorised to give investment advice and it is recommended that you discuss potential investments with an authorised financial advisor before proceeding.

However, given your level of income, making additional pension contributions will be more attractive now from a tax perspective than it was in the past. As well as the tax relief at source (personal pension contributions being made 'net' and 20% tax relief added to the fund), you can also claim higher rate pension relief to save tax at another 20%.

Pension contributions also reduce your adjusted net income for the purposes of calculating your available personal allowance, so total gross contributions can attract further relief at 20%. Whilst this report has advised that from a net of tax cash perspective the higher 5% mortgage represents the better option, you may still decide to opt for the lower payments on the basis of risk. If so, and so your mortgage interest relief is limited to 20%, making pension contributions is a good way of mitigating the extra tax cost of losing your personal allowance. Making pension contributions may also be a good strategy in future years even if you choose to mortgage the commercial property, to offset the tax in the event of rent or salary increases.

For instance, making a net contribution of £600 per month/£7,200 per tax year will be grossed up by adding £1,800 to your fund, and you will benefit from further personal pension tax relief of £3,600 (£1,800 being the higher rate tax relief and £1,800 from having your full personal allowance reinstated). Paying £7,200 into a pension will increase by the tax relief at source to £9,000 and you will receive additional tax relief to the value of £3,600. The net cost to you in making the pension contribution is just £3,600.

We have limited our analysis here to personal pension contributions, on the assumption that your current workplace pension is fixed at the maximum and no further contributions can be made. However, if you can increase your contributions to this scheme, the possibility of increased employer contributions may be beneficial, on top of any tax and NIC savings. You should discuss any pension contribution with an authorised financial adviser.

(D5) Main residence election

For CGT purposes, you can nominate any property in which you actually reside to be your main residence. Whichever property is your main residence benefits from Private Residence Relief (PRR). This exempts gains accruing during the time that the property is your main residence.

The property nominated does not have to be the residence you spend the most time in or the residence you use as your main address for everyday purposes.

It must however be a property you use as a home with some level of permanence. If you were to live at High Street for one week each month, you would meet these conditions and could nominate this property as your main residence for PRR purposes.

This may be advantageous because you expect High Street to increase in value substantially. Without a main residence election, when you sell the property, the increase in value will be subject to CGT at rates of either 24% or 18%. Based on your current circumstances, you would pay CGT at 24%.

Currently, Round Road is your main residence and has been since you purchased it. Without an election, your main residence is determined based on a combination of factors including where you spend the most time and which address is used for registrations such as car and doctor.

You can only have one main residence at a time, so while Round Road is your main residence, any gains accruing on High Street will be subject to CGT when the property is sold.

The flip side is that if High Street becomes your main residence, Round Road will not be.

When you sell Round Road, any capital gain will be time apportioned between time that the property was your main residence and time it was not. Gains made during the time it was your main residence will remain exempt. The last nine months of ownership will also qualify for PRR.

A PRR election can be made at any time within two years of a change in your residences.

After an election has been made, it can be varied at a later time by giving fresh notice to HMRC. Currently, Round Road is standing at a gain of £100,000, which is all exempt due to PRR. If you nominate High Street as your main residence, you can then vary the election so that Round Road is reinstated as your main residence at a later point.

PRR is not given for any parts of the house which are let out and which your tenants have exclusive access to. This would apply to each of your tenants' bedrooms at High Street.

Even if High Street is your main residence for only a short period of time, this will be advantageous because it will exempt gains during the last nine months of ownership, in addition to gains during the period it is nominated.

Any saving through making a PRR election would only be realised when you sell High Street. The amount of the saving would depend on the increase in the value of the property and whether you are a higher-rate taxpayer at the time of the sale (if so, the CGT saving will be at 24%).

The two-year time limit for making a PRR election starts from the date you first use the property as a residence (rather than when you purchase it).

Although the tax impact of taking the allowance and living at High Street will be slightly higher than being reimbursed expenses due to the NIC, on the basis that you expect the

property to increase in value substantially, we recommend that you live at 7 High Street while working in Coventry. This will give you the option to make the election for it to be your main residence.

The election can be delayed by two years from the date you move in, by which time you will have more information about the respective values of High Street and Round Road. The potential large CGT saving will outweigh the modest annual NIC costs.

We appreciate that you and your son may also wish to factor in any commercial considerations such as the advantages and disadvantages of living together before making a final decision. This should be reviewed in around 18 months' time so a decision may be taken before the two-year time limit expires.

(D6) Stamp Duty Land Tax (SDLT)

You will be liable to the 5% SDLT surcharge on the purchase of High Street because you already own other residential property.

There is no way to avoid the SDLT surcharge.

SDLT due on the purchase will be:

	£
£125,000 × 5%	6,250
£125,000 × 7%	<u>8,750</u>
	15,000

This is payable within 14 days of completion. SDLT is a deductible cost when calculating any capital gain on a future disposal.

You should note that your son would not pay the surcharge, on the basis that he owns no other property. However, as you have made clear that you do not wish the purchase to be in Steven's name, we have not provided any further analysis on this.

E. NEXT STEPS

Once you have had the opportunity to consider this report, please do not hesitate to contact us to deal with your queries and agree the way forward.

Chartered Tax Advisers
6 May 2026

APPENDIX 1

Comparison of tax due if £200,000 mortgage is borrowed against 2 Orchard Way or 7 High Street (based on a full year's rental income)

Income source	<u>Mortgage on 7 High Street</u>	<u>Mortgage on 2 Orchard Way</u>
	£	£
Employment income	58,700	58,700
Benefits	1,300	1,300
2 Orchard Way profit	34,000	24,000
7 High Street profit £(12,000 – 3,000)	9,000	9,000
Round sum allowance or additional rent	<u>6,000</u>	<u>6,000</u>
Total income	109,000	99,000
Less: Personal Allowance	<u>(8,070)</u>	<u>(12,570)</u>
Taxable income	<u>100,930</u>	<u>86,430</u>
£37,700 × 20%	7,540	7,540
£63,230 × 40%	25,292	
£48,730 × 40%		<u>19,492</u>
Tax due	32,832	27,032
Less: Relief for finance costs	(1,600)	-
Tax payable	<u>31,232</u>	<u>27,032</u>
Tax Difference (note below)		<u>4,200</u>

Breakdown on savings per annum by using the loan to make the commercial property refurbishments:

	£
Tax relief on commercial loan of £10,000 per annum	4,000
Add effect of losing personal allowance (£4,500 × 40%)	1,800
Less tax reducer on residential interest	<u>(1,600)</u>
Tax saving	4,200

Paying loan interest at 5% on a commercial mortgage costs £2,000 more per annum. The tax saving, even when set against the additional cost of borrowing, represents a cash saving of £2,200 per annum.

ASSESSMENT NARRATIVE FOR JULIA ANDERSON**Structure**

A simple pass or fail will be awarded.

Identification and Application

The following are the relevant topics for assessment with their weightings:

1	35%	Issues relating to finance costs
2	25%	Rental vs. employment income and deductible expenses
3	15%	Capital gains tax. Main residence election
4	25%	Other issues including loss of personal allowance, rent paid by son, pension contributions and SDLT

A grade of 0, 1, 2, 3, or 4 is awarded to each topic. The weighting is applied to that grade to produce a weighted average grade. This is then converted to a final absolute grade by rounding up or down to the nearest grade. In order to secure a pass, a final grade of 3 or 4 is required.

Relevant Advice and Substantiated Recommendations

The following are the relevant topics for assessment with their weightings:

1	40%	Whether the purchase of 7 High Street or the refurbishment of 2 Orchard Way should be funded by mortgage
2	35%	Whether Julia Anderson should stay at 7 High Street
3	10%	Possible Pension tax savings
4	15%	Advice relating to letting a room to Julia's son and other issues

The final grade will be determined for this skill in the same way as for Identification and Application.

APS REFLECTION SHEET

	Yes/No	Comments: What should I do differently next time?
GENERAL:		
Did you finish in time?		
Did you do a plan?		
Did you use your plan when you wrote up the report (or letter)?		
STRUCTURE:		
Did you use the correct report (or letter) format?

Have you explained to the client why they should do what you have recommended? Did you set out the pros and cons and weigh them up? Is your advice in relation to key areas technically correct?		
Did you consider the wider implications of your advice (such as commercial considerations and legal/ethical issues)?		
Having reviewed your answer, do you think that if you were the client, you would be happy paying for this advice?		

2. JACK AND STEFFI (NOV 2021)**REPORT**

To: Jack Clarke and Steffi Meyer
From: Chartered Tax Advisers LLP
Date: 5 November 2026
Subject: Property Transactions

A. INTRODUCTION

This Report is prepared for Jack Clarke ('Jack') and Steffi Meyer ('Steffi') collectively referred to as 'you'.

This Report is intended solely for use by you. No liability is accepted for any reliance on this Report by other parties.

This Report is based on your meeting with Sally Jones on 30 October 2026 and on Jack's email to Sally dated 2 November 2026. It is prepared in accordance with the law in force on 5 November 2026.

You wish to buy a new home together for around £450,000 to be funded by one of two options:

- 1) Option 1: The Old Rectory is sold and a new main residence acquired. 22 Westland Road is retained and continues to be let; or
- 2) Option 2: 22 Westland Road is sold and a new residence acquired with the proceeds, supplemented by savings if required. The Old Rectory is then sold with £400,000 of Jack's share of the proceeds used to buy a further buy-to-let property. The remaining £50,000 left is to be invested in savings.

This Report compares the UK taxation implication of both options.

B. EXECUTIVE SUMMARY

- Option 1 is cheaper in terms of Capital Gains Tax (CGT) as it involves the sale of one property instead of two. As Steffi has not lived at Westland Road since 2023, her gain will not be fully eligible for private residence relief (PRR) so CGT would be due on a sale.
- Option 1 is also cheaper in terms of Stamp Duty Land Tax (SDLT) as it involves the acquisition of one property instead of two.
- If Option 1 is pursued, we would recommend that:
 - a) Morela is asked to consent to a sale of The Old Rectory in March 2027. The CGT on Morela's share of the proceeds will then be £14,981 for both Jack and Morela. (Each would pay an extra £773 in CGT if the sale is deferred until September 2027.)
 - b) The acquisition of the new property should be made in Jack's sole name, preferably on the same day that the sale of The Old Rectory is completed. The SDLT on the new property will be £12,500 and will avoid the 5% SDLT surcharge for additional properties.
- The new property can then be put into joint names after the wedding as the transfer would then be free from both CGT and Inheritance Tax (IHT).

- As things stand, Steffi will be subject to a High Income Child Benefit Charge (HICBC) in 2026/27. We recommend that Steffi puts £4,800 into a personal pension on or before 5 April 2027 as this would obtain higher rate tax relief and avoid the HICBC. This will mean that more than half of the pension input would be funded by HMRC.
- We recommend that Westland Road is put into joint names after marriage. Rental profits would then be split 50:50 between you. This will save higher rate tax and will also reduce the HICBC.
- Excess savings should be transferred to an ISA to avoid paying tax on the interest and decrease risk of exposure to the HICBC in the future. Savings should be in joint names to allow use of Jack's lower tax band and personal savings allowance.

C. OPTION 1

Jack sells his 50% share of The Old Rectory and use the proceeds to fund the purchase of the new property.

Steffi continues to let Westland Road.

The Old Rectory can only be sold prior to Jack and Steffi's marriage with Morela's consent. Jack and Steffi intend to marry in September 2027.

(C1) Capital Gains Tax

Assuming a sale of The Old Rectory in September 2027, Jack would pay £15,754 of Morela's CGT liability (see Appendix 1).

Jack's gain on the disposal of his 50% share will qualify for full PRR because the property has been his main residence throughout his ownership.

However, Morela will only accrue PRR on her share of the gain for the period she lived in the house with Jack and for the final nine months of ownership.

Based on the Morela's estimate of her income in 2027/28, her CGT liability is £31,508. Jack has agreed to indemnify Morela for 50% of this liability, so Jack will have an exposure of £15,754.

If The Old Rectory is sold before your marriage (say in March 2027), the proportion of the gain eligible for PRR will increase.

As Morela is a basic rate taxpayer in 2026/27, some of the gain will be taxed at 18%. Jack's and Morela's CGT exposure will accordingly reduce to £14,981 each (a saving of £773 each).

Morela would need to consent to an early sale, but as she will benefit from the CGT reduction (and will have use of the proceeds at an earlier time), this may be something she would agree to.

A payment on account of CGT is due within 60 days of the completion of the sale (together with an online return notifying the disposal).

Jack will not need to file a return or make a payment as his gain will be covered by PRR.

Morela should however be reminded that she will need to file a return and pay the CGT (50% of which Jack will then reimburse).

(C2) Stamp Duty Land Tax

On the acquisition of a residential property for £450,000, the SDLT is £12,500 as shown below:

	£
£125,000 @ 0%	Nil
£125,000 @ 2%	2,500
<u>£200,000 @ 5%</u>	<u>10,000</u>
<u>£450,000</u>	<u>12,500</u>

However, SDLT rates are increased by a 5% surcharge where, at the end of the day of purchase, the purchaser (or a joint purchaser) has an interest in two or more dwellings.

This means that if either:

- 1) The new property is acquired before Jack sells The Old Rectory; or
- 2) The new property is acquired by Steffi (who already owns Westland Road),

then the SDLT payable on the acquisition of the new house will increase to £35,000:

	£
£125,000 @ 5%	6,250
£125,000 @ 7%	8,750
<u>£200,000 @ 10%</u>	<u>20,000</u>
<u>£450,000</u>	<u>35,000</u>

If the new house is bought in joint names (even after The Old Rectory has been sold), the SDLT will still be £35,000 because Steffi owns Westland Road.

Relief is available if a main residence is sold and replaced with a new one.

Where the previous main residence has not been sold by the end of the day on which the purchase of the new residence is completed, the 5% surcharge will be payable (as two properties are owned simultaneously). However, the purchaser can then apply for the excess SDLT to be refunded if the previous main home is sold within 36 months.

This does mean that the higher SDLT has to be paid upfront and later reclaimed. This has cash-flow consequences and should be avoided if possible.

Note that if a joint purchaser (ie Steffi) is replacing a main residence, she can qualify for the standard SDLT rates even if the main residence which was sold was, in fact, owned by their spouse.

This means if the new property is purchased in joint names after the date of marriage, Steffi will be treated as replacing a main residence because of Jack's disposal of The Old Rectory (that being her home as well). The 5% surcharge would not then apply and the SDLT exposure will be £12,500.

Alternatively, the new property could be purchased by Jack before the marriage and 50% of that property could then be gifted to Steffi after marriage. This transfer would take place at no-gain-no-loss for CGT and would be exempt from IHT.

There would be no SDLT on the transfer of property between you as no consideration would pass.

For simplicity we recommend that The Old Rectory is sold on the same day that the purchase of the new property is completed and that the new property is bought by Jack.

D. OPTION 2

Under Option 2, Westland Road will be sold. The proceeds would be used to buy a new property for Jack and Steffi to live in.

The Old Rectory will then be sold. Jack's share of the proceeds (£450,000 before CGT) will be used to buy a further buy-to-let property for £400,000. The money remaining would be invested in savings.

(D1) Capital Gains Tax

Because 22 Westland Road has not been Steffi's main residence throughout her period of ownership, there is a CGT exposure on sale.

Assuming Westland Road is sold in March 2027, the CGT liability will be £11,280 (see Appendix 2).

Based on her current income, Steffi does not have any basic rate band available. The CGT liability would therefore be at 24%.

If the sale of Westland Road is delayed until after the marriage in September 2027, the PRR will decrease and the CGT liability will increase by £1,553 to £12,833.

However, it will then be possible to take advantage of the inter-spouse transfer provisions to reduce the additional CGT. This could allow access to Jack's unused annual exempt amount (AEA) and his unused basic rate band.

As Jack's gain on the sale of The Old Rectory is likely to be eligible for full PRR, Jack will have a full AEA available to offset any gain.

The potential CGT saving on an inter-spouse transfer of Westland Road is up to £1,636, being £3,000 @ 24% and £15,270 @ 6% (on the basis Jack will have £15,270 of his basic rate band to tax the gain at 18% as opposed to 24%).

Whilst this eradicates the additional CGT entirely, you will also need to consider whether this saving is outweighed by the legal and professional costs of an inter-spouse property transfer.

(D2) Further Private Residence Relief considerations

It is possible to reduce the CGT exposure on the sale of Westland Road by moving back into the property at some point or choosing to move into it instead of buying a new property.

This is because Steffi will qualify for a period of 'deemed occupation' of up to three years if the period of absence is preceded and followed by actual occupation.

You wish to move closer to where Oscar wants to study for his A Levels, and we do not know whether a return to Westland Road would fit with these plans. But we mention this for completeness as this is a way of mitigating the CGT charge on Westland Road (either now or at some point in the future).

(D3) Stamp Duty Land Tax

Westland Road will be sold with the proceeds put towards buying a new home.

The Old Rectory will then be sold. A further buy-to-let property would then be acquired.

Again this will leave you with more than one property (being a new home and a buy-to-let property), so the SDLT liability will need to be carefully managed to avoid the 5% surcharge.

If Steffi sells Westland Road before the new home is acquired, SDLT will be charged on the new home at standard rates. The SDLT would then be £12,500.

This assumes that the new home is acquired in Steffi's sole name (as Jack will own The Old Rectory) and that the purchase takes place before your marriage.

Married couples are regarded as a single entity, so it is not possible to avoid the 5% surcharge by dividing ownership of different properties between spouses.

As Jack will hold a share of The Old Rectory, this interest will trigger the surcharge (albeit that a refund claim could then be made when the Old Rectory is sold, as you would be replacing a property previously used as your main residence).

If the new home is bought in Steffi's name before the sale of Westland Road is completed, Steffi will have interests in more than one property and the 5% SDLT surcharge could apply. This is not therefore recommended.

Steffi will not be able to claim relief under the 'replacement of a main residence' rule because Westland Road stopped being her main residence in December 2023 which (by the time of purchase) will be more than 36 months ago.

Assuming Steffi buys your new home, the purchase of a buy-to-let property for £400,000 will not attract the higher rates of SDLT if it occurs before the date of marriage and in Jack's sole name while he does not own another property.

In this event, the SDLT payable at the standard rates would be £10,000 as below;

	£
£125,000 @ 0%	Nil
£125,000 @ 2%	2,500
<u>£150,000 @ 5%</u>	<u>7,500</u>
<u>£400,000</u>	<u>10,000</u>

This is the cheapest SDLT option. Morela would need to agree to an early sale for this to be possible.

If the purchase occurs after your marriage, then the ownership of either Westland Road or the new home would trigger the higher rates of SDLT.

In this event, the total SDLT payable on this purchase would be £30,000;

	£
£125,000 @ 5%	6,250
£125,000 @ 7%	8,750
<u>£150,000 @ 10%</u>	<u>15,000</u>
<u>£400,000</u>	<u>30,000</u>

E. COMPARISONS AND RECOMMENDATIONS**(E1) Option 1**

	Pre-marriage (March 2027) £	Post-marriage (September 2027) £
CGT on The Old Rectory (Jack's exposure)	14,981	15,754
CGT on 22 Westland Road	N/A	N/A
SDLT on new main residence	12,500	12,500

(E2) Option 2

	Pre-marriage (March 2027) £	Post-marriage (September 2027) £
CGT on The Old Rectory (Jack's exposure)	14,981	15,754
CGT (Steffi on 22 Westland Road)	11,280	12,833
SDLT on new main residence	12,500	12,500
SDLT on new buy-to-let	10,000	30,000

(E3) Recommendation

Option 1 is cheaper in terms of the CGT exposure as it does not involve a sale of Westland Road.

Option 2 involves the purchase of two properties rather than one, and the SDLT exposure in that scenario will clearly be higher.

Option 1 is therefore recommended.

We suggest that Morela's agreement is sought for an early sale of The Old Rectory as the CGT exposure for both Morela and Jack is reduced.

We recommend that The Old Rectory is sold on the same day that the purchase of the new property is completed and that the new property is bought by Jack. The SDLT payable will then be £12,500.

If you wish for the new property to be held in joint names, Jack could gift a 50% share to Steffi after marriage.

F. OTHER ISSUES**(F1) High-Income Child Benefit Charge (HICBC)**

Jack claims child benefit in respect of Oscar of £1,355 per year (£26.05 per week).

Child benefit is tax-free, but a clawback charge applies if either the claimant or their partner has 'adjusted net income' in excess of £60,000 for a tax year. Adjusted net income means total income from all sources less gross pension contributions and/or Gift Aid payments.

The HICBC is 1% of the child benefit received for each £200 of adjusted net income over £60,000.

The charge applies to the partner with the higher income (which may not be the claimant). A 'partner' includes another individual with whom the claimant is living with as a spouse or civil partner. Therefore, Steffi is treated as Jack's partner for HICBC purposes (and has been since December 2023).

Steffi has the higher total annual income being £66,000. Note that even though £500 of Steffi's interest income will fall within her savings allowance, it is all taken into consideration for the HICBC.

As things stand, for 2026/27, there will be a HICBC for Steffi of £407 as below:

Total income	£(55,000 + 10,000 + 1,000)	£ 66,000
Less: HICBC threshold		<u>(60,000)</u>
Excess		<u>6,000</u>
Clawback %	$1\% \times 6,000 / 200$	30%
HICBC	$£1,355 \times 30\%$	<u>£407</u>

The HICBC could be avoided by Steffi reducing her adjusted net income to £60,000, either by making charitable donations or pension contributions.

For example, if Steffi made a pension contribution of £4,800, HMRC would add a further 25% meaning that $£4,800 \times 100/80 = £6,000$ would go into her pension fund.

The net cost to Steffi of making that contribution would be only £3,193 (see below).

Gross pension contribution	$£4,800 \times 100/80$	£ <u>6,000</u>
Higher rate tax relief obtained	$£6,000 \times 20\%$	1,200
Add: HICBC avoided		<u>407</u>
Tax saving		<u>1,607</u>
Net cost to Steffi	$£(4,800 - 1,607)$	<u>3,193</u>

The effective rate of tax relief obtained on such a payment will be around 47% (ie, of the £6,000 going into the pension fund, HMRC would effectively pay £2,807).

We therefore recommend that Steffi uses some of her savings to start a pension and to make a payment to the scheme of £4,800 on or before 5 April 2027.

If Steffi was a higher rate taxpayer in 2024/25 and 2025/26, a HICBC charge will have arisen for that year which cannot now be avoided.

Steffi is self-employed and is taxed on her business profits regardless of whether those profits are taken from the business. Incorporating her business into a limited company would enable her to control the extraction of profits (via salary and dividends) to avoid future HICBC charges. It would also enable Steffi (and possibly Jack) to use annual dividend allowances.

This is a discussion for a later stage as any decision to incorporate a business will involve detailed considerations of tax costs and legal issues.

(F2) Property income

Rental profits from Westland Road are currently taxed on Steffi. However, the property may be transferred CGT-free to Jack after the marriage such that the rental profits will then be taxed on Jack. Income tax would then be paid at the basic rate rather than at the higher rate, and exposure to the HICBC could be avoided.

Alternatively, Westland Road could be put into joint names. Again this should be done after the marriage to avoid CGT on the transfer. Rental profits would then be taxed 50:50 unless an election were made for profits to be taxed in accordance with your beneficial interests in the property (if this were different).

This will again have the effect of taking some of the rental profits away from a 40% income tax charge in Steffi's hands and into a 20% charge in Jack's, and decreasing Steffi's exposure to the HICBC.

Any transfer of property will be free from SDLT as long as no consideration passes between the parties. This is the case regardless of marital status.

(F3) Cash savings

Thought should be given to investing excess cash savings into an ISA, as any interest is then tax-free. There is an annual subscription limit of £20,000. It is not possible to have a joint ISA, but each of you may hold an ISA account so that a total of £40,000 can be invested in one tax year. This will decrease any future exposure to the HICBC. Similarly, if a portion of the taxable savings was to be taxed on Jack, by putting existing savings into a joint account, then Jack can use his personal savings allowance to reduce the tax paid on the interest and reduce any exposure Steffi has to the HICBC.

(F4) Inheritance Tax (IHT)

For IHT purposes, either Option will result in you owning a main residence and a buy-to-let property with a combined value of approximately £900,000.

IHT is payable at 40% on the value of the estate above the nil-rate band (NRB), currently £325,000. An additional Residence Nil Rate Band (RNRB) of £175,000 is available where you leave your home to your children or grandchildren and your estate is worth less than £2 million.

No IHT is payable on transfers to spouses on death and the surviving spouse can inherit any unused NRB or RNRB. A couple could therefore pass on up to £1 million tax free if their affairs are structured appropriately.

A detailed consideration of IHT is outside of scope of this Report and we recommend you seek further advice if required.

G. NEXT STEPS

Once you have had the opportunity to consider the contents of this report, we recommend that you contact us to discuss any queries and agree the way forward.

January 2027 – September 2027	Deemed occupation	<u>9</u>
		<u>102</u>

ASSESSMENT NARRATIVE FOR JACK AND STEFFI (NOV 2021)**Structure**

A simple pass or fail will be awarded.

Identification and Application

The following are the relevant topics for assessment with their weightings:

1	40%	Identification of the correct CGT considerations on the potential property disposals and applying these in order to reach a conclusion of the potential CGT payable by the relevant individuals.
2	25%	Identification of the exposure to the higher rates of SDLT and where these will or will not apply in relation to the proposed transactions, including calculation of the relevant amounts.
3	30%	Identification of the relevant issues relating to IT, namely the HICBC and taxation of the property/savings income, application to the scenario and calculation of the exposure to the HICBC.
4	5%	Identification of the relevant issues relating to IHT, including the application of the residence nil-rate band and possible exposure to IHT where the estate is not passed to a lineal descendant.

A grade of 0, 1, 2, 3, or 4 is awarded to each topic. The weighting is applied to that grade to produce a weighted average grade. This is then converted to a final absolute grade by rounding up or down to the nearest grade. In order to secure a pass, a final grade of 3 or 4 is required.

Relevant Advice and Substantiated Recommendations

The following are the relevant topics for assessment with their weightings:

1	35%	Advice and recommendations relating to CGT and private residence relief, for example use of 'no gain no loss' transfers and main residence elections to mitigate potential liabilities.
2	30%	Advice and recommendations relating to SDLT, including advice on how to minimise exposure to this by structuring the transactions tax-efficiently.
3	35%	Advice and recommendations relating to Income Tax, including how to mitigate exposure to the higher rate of tax and the HICBC and suggestions on how to minimise the tax on the rental income through 'no gain no loss' transfers or other arrangements and advice on how to minimise tax on the savings income.

The final grade will be determined for this skill in the same way as for Identification and Application.

CANDIDATE SCRIPT FROM NOVEMBER 2021

A real candidate script for this case study that scored a clear pass can be found on the CIOT website here:

<https://www.tax.org.uk/november-2021-past-exam-papers-scripts-suggested-answers>

Don't forget that the paper was set in November 2021 when the syllabus included tax law up to and including FA 2020 and so the candidate script answer will not be based on up to date tax law.

Examiner's report:

[Being reproduced with the permission of The Chartered Institute of Taxation]

CHIEF EXAMINER'S COMMENTS**Application and Professional Skills**

It is important for candidates to be aware that the requirement will not always be for a report from the external tax adviser to their client. This session the OMB question required a letter and the TOLC question required an internal report. It was noticeable this session that a number of candidates did not read the requirement. Thus:

- On the OMB question some produced reports rather than letters as required.
- On the TOLC question, candidates included a disclaimer, which would clearly not be appropriate for an internal report.
- On the VAT question some candidates produced letters rather than reports as required.

Whilst these mistakes will not automatically result in a candidate failing on structure (as we assess the answer as a whole), it will make it significantly harder to pass. This is a simple point and candidates must be alert to the required form of output and the target audience.

Beyond the basic point as to whether a letter or report is required, candidates need to ensure that the style of what they produce is appropriate. Therefore, if an internal report is required, as for the TOLC question, it is not appropriate to include disclaimers of liability.

Turning to a couple of presentational points:

- If abbreviations are used, we expect them to be defined when the term being abbreviated is first used, for example "... Business Asset Disposal Relief (BADR). On the Individuals question, some candidates were using non-standard definitions which were not defined: this would not be suitable for a client.
- We have been asked about whether a table of contents is required; it isn't required.

Finally, it is important that candidates appreciate that this paper isn't simply about providing technically correct advice. It is also about providing advice that is commercially sound (don't let the tax tail wag the commercial dog!) and meets any wider objectives that may be set out in the question. It requires candidates to step back and look at the entire scenario to assess whether their advice really is appropriate.

SPECIFIC COMMENTS ON APS INDIVIDUALS PAPER**General Comments**

This question asked candidates to consider two options for the funding of a marital home for Jack and Steffi. The scenario had Jack and Steffi currently living in a property (The Old Rectory) which Jack had bought with his ex-partner, Morela. Jack and Morela had a contract under which Jack would be liable for 50% of Morela's capital gains tax liability upon sale of the property. Steffi's former home is let. The first option was to fund the new marital home from the sale of The Old Rectory. The second option was to fund it from the sale of Steffi's property and replace the rental income stream by buying a new buy-to-let.

Candidates had to consider how each option might be implemented tax-efficiently, taking into account CGT and Stamp Duty Land Tax (SDLT), and the timing of the transactions (pre/post marriage). Candidates also had to consider how Jack and Steffi's income tax position might be optimised by reducing exposure to the high-income child benefit charge (HICBC) and higher rate of tax, as well as provide relevant comment on Inheritance Tax (IHT).

The candidates who passed this paper provided a clear recommendation of which option reduced the clients' overall exposure to tax, explaining how that option should be implemented. The SDLT considerations were critical to the overall assessment and some candidates missed this. Other candidates failed because, although the two options were competently discussed, there was no clear recommendation on which option the clients should choose. These two points account for the relatively low pass rate.

Structure

All candidates achieved a pass on this skill. However, non-standard abbreviations made some scripts difficult to follow. If abbreviations are used, before their first use, the full term should be given. If an experienced tax practitioner struggles with the abbreviations used, a client would certainly struggle.

Identification and Application

Capital Gains Tax:

Most candidates performed strongly in this area. Despite some arithmetic errors in counting months, candidates correctly explained and analysed the CGT position for each of the three parties on the sale of each of the two properties. Candidates understood private residence relief (PRR) well and handled the indemnity between Jack and Morela without issue.

Some candidates appeared to be confused about the rule whereby spouses/civil partners may have only one main residence between them for PRR purposes – thinking that, once married, Steffi would no longer be eligible for any PRR on Westland Road. Others thought that Steffi might be able to nominate Westland Road as her main residence even though it was let out and not used by her as a residence.

Stamp Duty Land Tax:

There was a wide range of competence demonstrated in this area. Some did not comment on it at all. While most appreciated that higher rates of SDLT were sometimes applicable, very few were able to accurately describe when they would apply. Many thought that higher rates of SDLT would apply on the purchase of the buy-to-let property simply because it was not a main residence. Others applied a simplified rule under which higher rates would apply if you are buying a property in addition to one you already own – but without appreciating the exception if you are replacing a main residence.

However, many did correctly appreciate the significance of marriage on SDLT, and the fact that the higher rates would apply to the whole transaction if it applies to one joint purchaser.

A disappointing number of candidates did not spot the fairly obvious point that Option 2 involved the purchase of two properties rather than one, and therefore the SDLT exposure in that scenario was bound to be higher.

Income Tax:

Candidates appeared comfortable discussing the Income Tax issues, with most spotting that Steffi would be liable to the HICBC as she was co-habiting with Jack, and that the rental income pushed her into the higher rate of tax.

Inheritance Tax:

Inheritance Tax only accounted for a small proportion of the credit available, given that Jack and Steffi's combined estate was within their combined available nil-rate bands (though not many actually pointed this out). Much of the advice given on PETs and available exemptions was somewhat moot.

Relevant Advice and Substantiated RecommendationsCapital Gains Tax:

Most candidates were able to give sensible recommendations from a CGT perspective. However, some gave advice based on an incomplete sequence of events (e.g. advising to sell Westland Road simply because it generated a lower CGT liability than The Old Rectory), unfunded suggestions (e.g. advising that Morela should transfer her share of The Old Rectory to Jack), or on maximising the immediate net cash position rather than minimising the overall tax exposure.

Stamp Duty Land Tax:

The strength of the advice on SDLT generally followed candidate's understanding of the rules around where the higher rate of SDLT applies. Nevertheless, if candidates were able to correctly advise how higher rates might be avoided on the marital home, credit was given. Very few candidates spotted how the higher rates might be avoided on the buy-to-let purchase under Option 2.

Income Tax:

Most candidates gave sensible advice on how exposure to the HICBC and the higher rate of tax might be avoided, for example, by making pension contributions, Gift Aid donations, or a no-gain-no-loss transfer of part of Westland Road to Jack after marriage.

3. JAN AND AUGUSTUS**REPORT**

From: Prestige Tax Solutions LLP
To: Jan Ewary and Augustus Novak
Date: 31 May 2026
Subject: Purchase of UK property

A. INTRODUCTION

This report considers the UK tax implications of Jan Ewary ('Jan') and Augustus Novak ('Augustus') purchasing a home in the UK using funds from their Octlandian bank accounts.

This report has been prepared for and is addressed to Jan Ewary and Augustus Novak and is intended for use by them only.

The content of the report is based on your meeting with Andrew Townsend on 1 May 2026 and information provided via email on 15 May 2026 by Jan Ewary and Augustus Novak.

No responsibility is accepted for any reliance placed on the contents of this report by third parties. It is based on tax legislation as it applies at the time of writing and any changes to the legislation may affect the conclusions of this report.

B. EXECUTIVE SUMMARY**(B1) Funding the purchase of UK property**

Jan and Augustus have a budget of £1m, funded entirely from their overseas bank accounts.

We recommend that Augustus funds the purchase using £38,000 from his overseas bank account. This represents his foreign income and gains arising in 2025/26, which, as he can make a claim for Foreign Income and Gains (FIG) relief, will have a UK tax cost of zero.

We recommend that Jan remits the remainder of the required funds from her Octlandian bank account.

As Jan is UK resident but cannot access the FIG regime, Jan's overseas income and gains arising in 2025/26 will be taxed regardless of whether she remits them to the UK. She will pay income tax of £3,750 and CGT of £23,280.

We recommend that she remits all of the £24,000 of rental income that she received in 2024/25, designating this amount to the Temporary Repatriation Facility (TRF) so it will be taxed at 12%, resulting in a tax charge of £2,880.

The balance of up to £410,000 on her account can then be remitted tax-free.

This provides Jan and Augustus with access to total funds of £1,004,090 to buy their UK home.

(B2) Acquisition of new property**Stamp Duty Land Tax (SDLT)**

SDLT will be £35,000 on a property costing £900,000. First time buyers' relief will not be available.

Rental income from top floor

Jan and Augustus will be taxed on rents received less allowable expenses paid. Expenses are allowable if they relate to the business of the letting. This will include redecoration and repairs but not purchase of new furniture.

Capital gain on the eventual sale

Private residence relief (PRR) will exempt the part of the gain relating to Jan and Augustus's occupation of the property. There is a limited relief available in respect of the part of the gain relating to the let part of the house, capped at £40,000.

C. FUNDING THE PURCHASE OF THE UK PROPERTY

UK resident individuals are taxed in the UK on their overseas income and gains in the tax year in which they arise, regardless of whether they are brought into the UK.

The tax rules regarding the taxation of overseas income and gains significantly changed as of 6 April 2025 with the introduction of the Foreign Income and Gains (FIG) regime, the Temporary Repatriation Facility (TRF) and rebasing. These changes will impact Jan and Augustus.

(C1) The FIG regime

Where the FIG regime applies, a UK resident individual can make a claim so that they are not taxable in the UK on their foreign income and gains.

The FIG regime only applies to taxpayers who meet the qualifying new resident condition.

When an individual becomes UK resident, they will be a 'qualifying new resident' if they have not been resident in the UK in any of the ten tax years immediately prior to that tax year.

An individual remains a qualifying new resident for the next three tax years following the year of arrival.

Augustus has been tax resident in the UK since 6 April 2024. Augustus will have been a qualifying new resident for the tax years 2024/25 and 2025/26 and will remain a qualifying new resident for 2026/27 and 2027/28.

The FIG regime applies only from 2025/26. So, Augustus will be able to potentially claim FIG relief for the three tax years 2025/26, 2026/27 and 2027/28.

Jan has been tax resident in the UK since 6 April 2024 and was also previously tax resident in the UK between 1 January 2019 and 31 December 2021, due to her three-year work secondment.

As the work secondment falls within the ten years prior to becoming UK resident in 2024/25. Jan is therefore not a qualifying new resident.

Jan will not be able to access the FIG regime and from 2025/26 will be taxed on her foreign income and gains on an arising basis.

(C2) The Temporary Repatriation Facility (TRF)

The TRF is a transitional arrangement for UK resident individuals who were remittance basis users before 6 April 2025.

Taxpayers, such as Jan and Augustus, who claimed the remittance basis of taxation in a tax year prior to 2025/26 will be taxed in the UK on their unremitted foreign income and gains as and when those income and gains are remitted to the UK.

However, taxpayers can side-step the normal rules for the taxation of remittances and instead choose to use the TRF to bring their previously unremitted income and gains into the UK.

To be eligible to use the TRF for a tax year, the individual must be UK resident in the tax year in which the TRF is claimed and must have been taxed on the remittance basis in any tax year prior to 2025/26.

The TRF incentivises previous remittance basis users to pay UK tax on unremitted foreign income and gains arising before 5 April 2025 by taxing these amounts at a lower 'flat' rate.

The flat tax rates of the TRF are:

2025/26: 12%

2026/27: 12%

2027/28: 15%

As both Jan and Augustus were taxed on the remittance basis in the tax year 2024/25, they are eligible to use the TRF, should they wish.

(C3) Rebasing of foreign assets to 5 April 2017

'Rebasing' is available to former remittance basis users who held foreign assets at 5 April 2017 and who sell those assets on or after 6 April 2025.

Rebasing allows such individuals to calculate gains or losses on the sale of these foreign assets by using the market value of the asset at 5 April 2017 (instead of historic base cost).

The effect of rebasing is that only gains arising since April 2017 are charged to capital gains tax (CGT). The growth in value of the asset between acquisition and April 2017 falls out of charge.

To qualify for rebasing, the individual must have previously claimed to use the remittance basis.

Rebasing applies automatically where the conditions are met.

However, the individual can make an election to disapply rebasing, on an asset-by-asset basis and use historical cost if this produces a more beneficial result.

Jan has made two disposals (the house and the sculpture) in 2025/26, both of which will qualify for rebasing.

Augustus has made a disposal of some shares in 2025/26. This would also qualify for rebasing. However, Augustus also qualifies for FIG relief.

If Augustus claims FIG relief, the gain on the foreign shares will be exempt from CGT. Rebasing of that asset therefore becomes irrelevant.

(C4) Using mixed funds

Both Jan's and Augustus's Octlandian bank accounts are mixed funds as they are overseas funds of money which contain a mixture of overseas income (interest, rent),

capital gains and 'clean' capital (inheritances, money held at the date of triggering UK residence).

If money is remitted to the UK from a mixed fund, special statutory ordering rules are used to determine whether the amount remitted is income, capital gains or clean capital. This will in turn determine how the remittance is taxed in the UK.

The ordering starts with income and/or gains from the current tax year first and then from each previous tax year in turn.

The general effect of the rules is that income is remitted before capital gains, and clean capital is remitted last.

(C5) The mixed fund rules applied to Augustus

Any amount that Augustus may remit in 2026/27 comes from a mixed fund and is therefore matched with income and gains from 2025/26 before income and gains from 2024/25 and only finally matched against the brought forward balance on the account.

The remittance would take place in the following order:

1st	Foreign income 2025/26	8,000
2nd	Sale proceeds 2025/26 (gain element £20,000)	30,000
3rd	Foreign income 2024/25	5,000
4th	Sale proceeds 2024/25 (gain element £75,000)	200,000
5th	Balance	<u>235,000</u>
		<u>£478,000</u>

Foreign Income and gains arising in 2025/26

In the absence of any claims, as Augustus is UK resident in 2025/26, he will be taxed on his overseas income and gains arising in the tax year.

Augustus is a qualifying new resident for the tax year 2025/26. Therefore he will be able to claim FIG relief.

Where a claim for FIG relief has been made, the income and gains specified in the claim can be brought to the UK at any time without incurring a UK tax charge.

Where any claims for FIG relief are made for a tax year, no personal allowance or capital gains tax annual exempt amount (AEA) is available for that tax year.

We recommend that Augustus claims FIG relief for both his foreign income and foreign gains in 2025/26 as the tax savings outweigh the loss of the AEA (due to Augustus's level of income, he cannot claim any personal allowance even without a FIG claim).

Augustus will not therefore have any chargeable overseas income or gains in 2025/26.

Foreign income 2024/25

In the absence of any claims, remitted income of £5,000 from 2024/25 would be taxed in 2026/27 at 45%, giving an income tax liability of £2,250.

Sale proceeds from 2024/25

In the absence of any claims, remitted gains of £75,000 from 2024/25 would be taxed in 2026/27 at 24% giving a CGT liability of £18,000. (No AEA is available if Augustus makes a claim for FIG relief in that year.)

The remaining £200,000-£75,000 = £125,000 of the capital proceeds on the house sale represents the probate value of the house. This is clean capital and not taxable if remitted to the UK.

We recommend that if Augustus chooses to remit his income and gains from 2024/25, he should designate all of the unremitted foreign income and foreign gains to be subject to the TRF. This would reduce the tax charge to £80,000 @ 12% = £9,600. A TRF designation would therefore provide a tax saving of £18,000 + £2,250 - £9,600 = £10,650.

Balance on account

If Augustus remits the brought forward balance on the account, this will be a remittance of clean capital as it represents income and gains accumulated prior to becoming UK resident and therefore will not be taxed in the UK.

(C6) The mixed fund rules applied to Jan

Any amount that Jan may remit in 2026/27 comes from a mixed fund and is therefore matched with income and gains from 2025/26 before income and gains from 2024/25 as follows:

1st	Foreign income 2025/26	12,000
2nd	Sale proceeds 2025/26 (net gains £100,000)	550,000
3rd	Foreign income 2024/25	24,000
4th	Balance	<u>410,000</u>
		<u>£996,000</u>

As Jan cannot access the FIG regime, she is taxed on her foreign income and gains arising in 2025/26 regardless of whether they are remitted to the UK.

Foreign income 2025/26

The Octlandian rental income has already been taxed overseas. As this source of income will be taxed both in the UK and in Octlandia, there is scope for double tax relief (DTR) and Jan will get a tax credit for the lower of the UK tax suffered (45%) and the Octlandian tax suffered (20%).

The £12,000 will be grossed up for the foreign tax suffered to give £15,000. This will be taxed in the UK at 45% to give £6,750. DTR will be available, and Jan will get a tax credit for the foreign tax suffered of £3,000. Therefore, the tax paid on the remitted rental income will be £6,750-3,000 = £3,750.

Sales proceeds 2025/26

Jan is eligible for April 2017 rebasing as she has previously claimed to use the remittance basis.

The gain on the house sale will be calculated using the April 2017 value of £250,000 giving a gain of £150,000.

We recommend that Jan elects to disapply rebasing to the disposal of the sculpture as using original cost gives a bigger allowable loss of £50,000.

This will be offset against the gain giving a net gain of £100,000.

The £3,000 AEA will be deducted and the remaining £97,000 of gain will be taxed at 24%. Jan's CGT liability will therefore be £23,280, as shown in Appendix 1.

Foreign income 2024/25

Remitted income of £24,000 from 2024/25 is taxed in 2025/26. This would similarly be grossed up for the foreign tax suffered, meaning a total of £30,000 is taxable. This is taxed at 45% to give £13,500 of a tax liability before DTR. Jan will get a tax credit for the foreign tax suffered of £6,000. Therefore, the tax paid on the remitted rental income will be $£13,500 - 6,000 = £7,500$.

As Jan previously claimed the remittance basis, she can designate £24,000 of her unremitted foreign rental income to be subject to the TRF. The designation under the TRF is made for the amount net of foreign tax paid. This means that amounts designated under the TRF do not qualify for any foreign tax credits.

No grossing up is required. This net figure of £24,000 will simply be taxed at 12%. This would give rise to a tax charge of $£24,000 @ 12\% = £2,880$.

We recommend that if Jan chooses to remit this rental income, she makes a claim under the TRF as she will save £4,620 ($£7,500 - £2,880$).

Balance

If Jan remits the brought forward balance on the account, this will be a remittance of clean capital as it represents income and gains accumulated prior to becoming UK resident and therefore will not be taxed in the UK.

(C7) Recommendations as to use of mixed funds to purchase the UK property

Augustus should remit £38,000 from his Octlandian bank account. This represents his income and gains from 2025/26. He will not pay any tax on this if he claims FIG relief.

Jan should remit all £996,000 from her Octlandian bank account.

Her foreign income and gain arising in 2025/26 will be taxed in the UK regardless of whether she remits them.

Sha should designate the £24,000 of rental income from 2024/25 to the TRF and pay tax at 12%.

This will then allow her to access the balance remaining which is clean capital and can be remitted tax free

The total tax payable by Jan will be $£29,910 (£3,750 + £23,280 + £2,880)$.

This leaves Jan and Augustus with a net amount available of $£1,004,090 (£996,000 - £29,910 + £38,000)$ to put towards the purchase of their new home.

This most tax-efficient route represents an uneven balance in the respective cash contributions made towards the property.

If Jan and Augustus wished to contribute equal cash towards the property, Augustus would have an additional tax cost to access the remainder of his bank account. To access the £440,000 balance, Augustus could make a TRF designation for the income and gains from 2024/25 of £80,000 to be taxed at 12%. This would incur a tax cost of £9,600.

Augustus should be aware that the facility to make a TRF designation will not be available after 5 April 2028. If Augustus eventually intends to remit the remaining £440,000 from his Octlandian bank account, he should do so before 5 April 2028. He can then make a TRF designation for the income and gains from 2024/25 of £80,000 as above, paying income tax at 12% if claimed in the 2026/27 year or 15% if claimed in 2027/28, rather than income tax at 45% and CGT at 24%.

The brought forward balance represents clean capital and can therefore be remitted tax free.

D. NEW PROPERTY PURCHASE

Jan and Augustus have found a property that they plan to buy and would like some advice on the tax implications of purchasing it and letting out the self-contained flat on the top floor.

(D1) Stamp Duty Land Tax (SDLT)

The SDLT that will be payable by Jan and Augustus on a property with a purchase price of £900,000 is £35,000. See Appendix 2.

Jan and Augustus will not qualify for first time buyers' relief as this is not available if any of the joint buyers have owned a residential property anywhere in the world. This includes property acquired through inheritance. Both Jan and Augustus have previously owned properties in Octlandia. In any case, first time buyers' relief is not available if the property has a price of over £500,000.

(D2) Rental income

As the gross receipts from letting out the top floor of the property will not exceed £150,000 in a tax year, the taxable profit will be calculated using the cash basis.

This means that each tax year, Jan and Augustus will be taxed on rents received less allowable expenses paid, i.e. the amounts physically received and paid in the year.

Expenses are deductible from rents only if they are 'wholly and exclusively' for the business of the letting. Such expenses will include the fees of a letting agent. It will also include a proportion - presumably one third - of insurance, water charges and council tax relating to the let part of the house.

The cost of redecorating the top floor will be a deductible expense as will the replacement of the kitchen units which will be considered a repair. As Jan and Augustus are letting the property furnished, they can claim relief for the cost of replacing domestic items such as furniture, household appliances and kitchenware.

However, the cost of the new furniture for the living space will not be deductible.

The net rental income will then be split between Jan and Augustus in accordance with their actual beneficial ownership as determined by the amount contributed by each of them towards the cost of the property.

If, for example, the total cost of the purchase, including SDLT and legal and professional fees, is £1m and Augustus contributed £38,000 as advised earlier and Jan contributes the balance of £962,000, the split of the property income would be 4% taxed on Augustus and 96% taxed on Jan.

As both Jan and Augustus are additional rate taxpayers, all the rental income will be subject to income tax at 45%. However, if in the future circumstances change such that one of them is a higher or basic rate taxpayer, this split of income may not be tax efficient. Jan and Augustus can change their beneficial interests by signing an agreement to split income differently. Each will then be taxed in accordance with their new beneficial interests.

(D3) Capital gains tax (CGT) on eventual sale

The house will be Jan and Augustus' main residence. The general rule is that the gain on sale which relates to their occupation is exempt from CGT as it is covered by Principal Residence Relief (PRR).

However, as Jan and Augustus will be occupying only two thirds of the property only two thirds of the eventual gain on sale will be exempted by PRR.

There is a limited relief for the gain in respect of the part of the residence which has been let. i.e. the remaining one third of the gain

Lettings relief is the lowest of three amounts:

1. The gain attributable to the let part which is not covered by PRR.
2. The amount of the PRR.
3. A fixed amount of £40,000.

Jan and Augustus should be aware that any gains arising in the last nine months of ownership will be fully exempt, as long as all of the property has been used for living accommodation at some point during the period of ownership. This might be relevant if Jan and Augustus choose not to rent the top floor for all of the period of ownership of the house.

Any capital gain which is chargeable after PRR and lettings relief will be split between Jan and Augustus based on their beneficial ownership. They will each be able to set their AEA against their share of the chargeable gain and they will pay CGT on the balance at the applicable rates.

E. NEXT STEPS

Once Jan and Augustus have had the chance to consider the contents of this report, we suggest that they contact Andrew Townsend to arrange a meeting to agree the way forward.

APPENDIX 1Calculation of Jan's CGT liability in 2025/26

Asset	Sale Proceeds	CGT Base Cost	Chargeable Gain / (Allowable Loss)
House	400,000	250,000	150,000
Artwork	150,000	200,000	<u>(50,000)</u>
Net gain			100,000
Less: AEA			<u>(3,000)</u>
Taxable			<u>97,000</u>
CGT at 24%			<u>£23,280</u>

APPENDIX 2Calculation of SDLT on town house with price of £900,000

£125,000 × 0%	£
£125,000 × 2%	Nil
£650,000 × 5%	2,500
Total SDLT payable	<u>32,500</u>
	<u>35,000</u>

ASSESSMENT NARRATIVE FOR JAN AND AUGUSTUS**Structure**

A simple pass or fail will be awarded.

Identification and Application

The following are the relevant topics for assessment with their weightings:

1	20%	Explaining FIG regime and applying to each of Augustus and Jan
2	20%	Explaining TRF and applying to each of Augustus and Jan
3	20%	Explaining rebasing and applying to each of Augustus and Jan
4	20%	Explaining mixed fund ordering rules and applying to each of Augustus and Jan
5	5%	Explaining availability of DTR on Jan's foreign rental income.
6	15%	Calculating and explaining SDLT on new property. Explaining how rental income will be calculated and allocated between Augustus and Jan. Explaining CGT reliefs available on sale.

A grade of 0, 1, 2, 3, or 4 is awarded to each topic. The weighting is applied to that grade to produce a weighted average grade. This is then converted to a final absolute grade by rounding up or down to the nearest grade. In order to secure a pass, a final grade of 3 or 4 is required.

Relevant Advice and Substantiated Recommendations

The following are the relevant topics for assessment with their weightings:

1	20%	Recommendation that Augustus claim FIG relief in respect of his 2025/26 income and gains
2	25%	Recommend that Augustus and Jan designate their unremitted income and gains of 2024/25 under TRF
3	10%	Recommend that Jan disapply rebasing for the gain on the sculpture
4	40%	Recommendation on how much to remit from each account to fund purchase of property
5	5%	Advise that first time buyers' relief not available on SDLT property purchase

The final grade will be determined for this skill in the same way as for Identification and Application.
