INTRODUCTION

This Pre Revision Question Bank for Module D of the Awareness paper contains 2 full exam standard 12 question tests with answers updated to Finance Act 2019.

This question bank forms an important part of your preparation for the examination – question practice is the key to passing exams. We recommend that you use these tests to consolidate your knowledge after you have worked through all of the study packs for your three chosen Modules. They will be a useful part of your preparation for the pre revision mock examination.

In the real exam each Module will have 12 questions and each question carries 5 marks. You must answer all the questions from the three Modules you are sitting.

Your final score out of 180 is turned into a percentage – the pass mark is 50% overall, but with a **minimum mark for each Module** set at 21 marks out of the 60 marks available ie 35%. Even if a pass mark in excess of 50% overall has been achieved, if the minimum mark of 35% has not been achieved in all three modules then the entire Awareness paper would need to be re-sat.

We recommend that you attempt each test in this bank as if you were in the real exam, ideally doing “Test 1” for this Module along with both the “Test 1” questions from the pre revision question banks for your other two Modules, allowing yourself 3 hours to answer all three Modules.

You should answer questions in brief bullet points and/or summary computations where appropriate. There are no presentation marks in this paper but bear in mind that the marker must be able to read and follow your answer.

You should make all calculations to the nearest month and pound unless stated otherwise.

You may use a calculator and the CTA Tax Tables.

You should try to avoid just reading the answers to questions - it is all too easy to nod as you read our answer saying “yes I know those points” - the test is would you have actually put those points in your answer? You won't find this out unless you write the answers out yourself.

5. Where the remittance basis is claimed, the advantage is that the individual pays tax only on overseas income which is remitted to the UK rather than the total amount arising. [1]
- However, in claiming the remittance basis, individuals lose their entitlement to a personal allowance for Income Tax purposes. [1]
- For Franklin, the claim will mean that he saves tax on income of £14,400 (£1,200 x 12 months) but loses a personal allowance of £12,500. [1]
- Franklin has now been in the UK for six years so will soon need to consider whether he is liable to pay the remittance basis charge if the remittance basis is claimed. [1]*
- This will require a payment of £30,000 to be made once Franklin has been resident in the UK for 7 of the last 9 tax years (£60,000 when he has been resident for 12 out of the last 14 tax years). [1]*
